The global Wire Harness Fully Automatic Flexible Production Line market size is predicted to grow from US$ 306 million in 2025 to US$ 430 million in 2031; it is expected to grow at a CAGR of 5.8% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

The wire harness fully automatic flexible production line is an advanced production system that integrates automation, informatization and flexible manufacturing. It is mainly used for wire harness manufacturing in the fields of automobiles, home appliances, industrial equipment, etc.

The fully automatic flexible production line for wire harnesses has the remarkable characteristics of high automation, intelligence and flexibility. First, in terms of automation, the production line integrates advanced automatic wire cutting, stripping, crimping, plugging, welding, testing and marking equipment to realize automatic operation of the entire process of wire harness production, greatly reducing manual intervention and improving production efficiency and consistency. Secondly, in terms of intelligence, the system widely uses intelligent manufacturing technologies such as industrial robots, machine vision, PLC control systems and MES (manufacturing execution system), which can realize real-time monitoring, data collection, process control and quality traceability, and improve the quality management level of products. In addition, its flexibility is particularly prominent. It can quickly switch production processes and equipment parameters according to different product designs, adapt to the customized production needs of multiple varieties and small batches, and effectively

solve the problems of low efficiency and resource waste of traditional production lines during frequent model changes. At the same time, the whole line has a high degree of modularity and scalability. Enterprises can flexibly increase or decrease equipment modules according to their own production capacity needs to improve the return on investment. Furthermore, the fully automatic flexible wire harness production line supports docking with the ERP system to realize order-driven production, making the entire manufacturing process more collaborative and transparent.

According to the survey, the market growth rate of China's fully automatic flexible production line for wiring harnesses is significant. Calculated by revenue, the market size will be 557 million in 2023 and 612 million in 2024, accounting for 28.49% of the world. It is expected to increase to 972 million in 2031, and the proportion will increase to 31.08%, showing China's important position in the global industrial landscape. With the continued rise in downstream demand for new energy vehicles, intelligent manufacturing, etc., China's market share is expected to further expand. The development of the Chinese market presents the following characteristics:

1. Reconstruction of the competitive landscape: Komax's market share in China is gradually shrinking (27.05% in 2023, and 26.26% in 2024), while domestic equipment is rapidly penetrating with its price advantage. The domestic manufacturer leader JH Precision Philippines's domestic market share will rise from 13.98% in 2023 to 15.40% in 2024. Other domestic manufacturers such as Hacint intelligence technology, Jiangsu Bozhiwang, and Harmontronics Automation Technology occupy a certain share;

2. Changes in the product landscape: New energy vehicles have spawned an explosion of demand for high-voltage production lines, and the price of high-voltage production lines is more expensive than that of low-voltage production lines. It is expected that in 2031, the market share of high-voltage wiring harness fully automatic flexible production lines will will account for 44.72%.

It is expected that in the future, Chinese companies will rely on the triple combined power of 'policy dividends + cost advantages + demand depth' to promote the continued expansion of the global share of domestic equipment.
