The global Wireless Antennas in Automotive market size is predicted to grow from US\$ 7131 million in 2025 to US\$ 10212 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

Wireless antennas used in the automotive field are automotive-grade antenna products designed for passenger vehicles, commercial vehicles, and intelligent connected vehicles to support broadcast reception, navigation and positioning, cellular communication, and related wireless connectivity functions. These products are typically deployed in forms such as roof shark-fin antennas, glass-mounted antennas, hidden internal antennas, and other special structural designs, with installation locations including the vehicle roof, windshield, side windows, dashboard interior, body trim interior, and communication module interior. From a functional perspective, automotive wireless antennas mainly serve three categories of demand: broadcast reception, navigation and positioning, and cellular connectivity. Broadcast reception antennas are used for receiving AM, FM, DAB, and SXM signals. Navigation and positioning antennas are used for GNSS systems such as GPS, GLONASS, BeiDou, and Galileo. Cellular connectivity antennas are used for 2G, 3G, 4G, and 5G vehicle communication, supporting applications such as telematics, remote diagnostics, over-the-air updates, eCall, and remote control. Some products integrate two or three of these functions within one module, but for classification purposes they may be assigned according to their primary function or the key positioning emphasized by the manufacturer. Overall, automotive wireless antennas have evolved from traditional single-function broadcast components into essential hardware within the connectivity architecture of modern vehicles. With the growth of smart cockpits, remote services, driver assistance, and high-precision positioning, these products continue to develop toward higher integration, smaller size, concealed installation, and multi-band multi-mode capability, while

becoming more closely linked with vehicle E/E architecture, T-Box, TCU, and in-vehicle infotainment systems.

The industry position of wireless antennas used in the automotive field has shifted from that of a traditional low-visibility supporting component to a foundational interface within the connectivity architecture of intelligent vehicles. In the past, automotive antennas were mainly associated with AM/FM broadcast reception and basic signal reception enhancement, and their role within the overall vehicle system was relatively limited. However, as vehicle electronic and electrical architectures continue to evolve, demand for both external communication and internal system coordination has increased significantly. As a result, the functional scope of automotive wireless antennas has expanded well beyond simple reception and now includes broadcast reception, navigation and positioning, cellular communication, remote control, over-the-air updates, fleet management, emergency calling, and broader connected vehicle communication functions. In this context, the antenna is no longer merely a discrete part mounted on the roof or glass, but one of the core hardware interfaces working together with the T-Box, TCU, smart cockpit, driver assistance systems, vehicle control architecture, and remote service platform. For OEMs and Tier 1 suppliers, the importance of automotive antennas is increasingly defined not by whether they are present, but by whether their performance is sufficient, their integration capability is strong, and their platform compatibility is reliable. Especially as intelligent connected vehicles become more widespread, antennas are becoming essential components that directly affect vehicle connectivity, positioning capability, and the quality of remote digital services, which is one of the main reasons this segment continues to retain strategic relevance and demand resilience.

From the perspective of product evolution, the clearest trends in the automotive wireless antenna industry are higher integration, smaller size, more concealed installation, and multi-band multi-mode capability. Traditional rod antennas or single-purpose broadcast antennas are no longer sufficient for the increasingly complex wireless requirements of modern vehicles. Mainstream products are now moving toward roof shark-fin designs, glass-mounted antennas, hidden internal antennas, and other special integrated structures. Among these, the roof shark-fin form remains the most widely adopted because it offers a practical balance among styling, aerodynamic performance, ease of installation, and multi-function integration. At the same time, glass-mounted and hidden internal antenna solutions are becoming more important because they help reduce exposed structures, improve design integration, optimize packaging space, and simplify assembly. From the functional side, broadcast reception, navigation and positioning, and cellular connectivity have become the three core categories, but the real growth

driver of the market is not any single function alone. Instead, it lies in the combination and coordination of multiple wireless functions within one module. In other words, the market increasingly demands products capable of handling broadcast, GNSS, and cellular communication simultaneously, and potentially even more wireless tasks. Going forward, competition will no longer focus primarily on whether a supplier can produce a particular type of antenna, but on whether it can achieve multi-function coordination, stable mass production, and platform-level integration within limited vehicle space. This will continue to raise technical barriers, customer stickiness, and nomination thresholds across the industry.

From the standpoint of regional supply structure and long-term market prospects, the automotive wireless antenna industry has already developed into a global competitive landscape shaped by Japanese, Korean, Mainland Chinese, Taiwanese, European, and American players, each with different strengths. Japanese companies generally maintain advantages in traditional vehicle antenna engineering, long-term OEM supply relationships, and manufacturing consistency. Korean suppliers are active in vehicle electronics integration, intelligent vehicle connectivity, and production coordination. Mainland Chinese companies are advancing rapidly in intelligent connected vehicle applications, high-precision positioning, customized development, and local OEM support. Taiwanese suppliers show flexibility in RF component ecosystems, vehicle module cooperation, and manufacturing responsiveness. European and American firms continue to hold influence in multi-function antenna solutions, global platform customers, and high-reliability or special-application scenarios. On the demand side, the major markets are still expected to remain China, Japan, Korea, Europe, and North America, where intelligent vehicle penetration is relatively high and expectations for connected services, remote functions, high-precision positioning, driver assistance, and online vehicle capability are stronger. Overall, as long as the automotive industry continues to move toward intelligence, connectivity, and service-oriented operation, automotive wireless antennas will not remain a marginal accessory market. Instead, they will increasingly be regarded as critical foundational components. Their long-term opportunities will come not only from vehicle shipment growth, but also from higher wireless functionality per vehicle, more integrated communication tasks, and rising value per unit, supporting a positive medium- to long-term outlook for this segment.

LP Information, Inc. (LPI) ' newest research report, the "Wireless Antennas in Automotive Industry Forecast" looks at past sales and reviews total world Wireless Antennas in Automotive sales in 2025, providing a comprehensive analysis by region and market sector of projected Wireless Antennas in Automotive sales for 2026 through 2032. With Wireless Antennas in Automotive sales broken down by region, market

sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Wireless Antennas in Automotive industry.

This Insight Report provides a comprehensive analysis of the global Wireless Antennas in Automotive landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Wireless Antennas in Automotive portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Wireless Antennas in Automotive market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Wireless Antennas in Automotive and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Wireless Antennas in Automotive.

This report presents a comprehensive overview, market shares, and growth opportunities of Wireless Antennas in Automotive market by product type, application, key manufacturers and key regions and countries.

Key Questions Addressed in this Report

What is the 10-year outlook for the global Wireless Antennas in Automotive market?

What factors are driving Wireless Antennas in Automotive market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Wireless Antennas in Automotive market opportunities vary by end market size?

How does Wireless Antennas in Automotive break out by Type, by Application?

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Wireless Antennas in Automotive Annual Sales 2021-2032
- 2.1.2 World Current & Future Analysis for Wireless Antennas in Automotive by Geographic Region, 2021, 2025 & 2032
- 2.1.3 World Current & Future Analysis for Wireless Antennas in Automotive by Country/Region, 2021, 2025 & 2032
- 2.2 Wireless Antennas in Automotive Segment by Type
 - 2.2.1 UHF Antenna
 - 2.2.2 VHF Antenna
 - 2.2.3 Wireless Antennas in Automotive Sales by Type
 - 2.2.3.1 Global Wireless Antennas in Automotive Sales Market Share by Type (2021-2026)
 - 2.2.3.2 Global Wireless Antennas in Automotive Revenue and Market Share by Type (2021-2026)
 - 2.2.3.3 Global Wireless Antennas in Automotive Sale Price by Type (2021-2026)
- 2.3 Wireless Antennas in Automotive Segment by Installation Position
 - 2.3.1 Roof Shark Fin
 - 2.3.2 Glass-Mounted
 - 2.3.3 Hidden Internal
 - 2.3.4 Other
 - 2.3.5 Wireless Antennas in Automotive Sales by Installation Position
 - 2.3.5.1 Global Wireless Antennas in Automotive Sales Market Share by Installation Position (2021-2026)
 - 2.3.5.2 Global Wireless Antennas in Automotive Revenue and Market Share by

Installation Position (2021-2026)

2.3.5.3 Global Wireless Antennas in Automotive Sale Price by Installation Position (2021-2026)

2.4 Wireless Antennas in Automotive Segment by Function

2.4.1 Broadcast Reception

2.4.2 Navigation & Positioning

2.4.3 Cellular Connectivity

2.4.4 Other

2.4.5 Wireless Antennas in Automotive Sales by Function

2.4.5.1 Global Wireless Antennas in Automotive Sales Market Share by Function (2021-2026)

2.4.5.2 Global Wireless Antennas in Automotive Revenue and Market Share by Function (2021-2026)

2.4.5.3 Global Wireless Antennas in Automotive Sale Price by Function (2021-2026)

2.5 Wireless Antennas in Automotive Segment by Application

2.5.1 Passenger Cars

2.5.2 Commercial Vehicles

2.5.3 Wireless Antennas in Automotive Sales by Application

2.5.3.1 Global Wireless Antennas in Automotive Sale Market Share by Application (2021-2026)

2.5.3.2 Global Wireless Antennas in Automotive Revenue and Market Share by Application (2021-2026)

2.5.3.3 Global Wireless Antennas in Automotive Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Wireless Antennas in Automotive Breakdown Data by Company

3.1.1 Global Wireless Antennas in Automotive Annual Sales by Company (2021-2026)

3.1.2 Global Wireless Antennas in Automotive Sales Market Share by Company (2021-2026)

3.2 Global Wireless Antennas in Automotive Annual Revenue by Company (2021-2026)

3.2.1 Global Wireless Antennas in Automotive Revenue by Company (2021-2026)

3.2.2 Global Wireless Antennas in Automotive Revenue Market Share by Company (2021-2026)

3.3 Global Wireless Antennas in Automotive Sale Price by Company

3.4 Key Manufacturers Wireless Antennas in Automotive Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Wireless Antennas in Automotive Product Location
