Abstracts

The global Wireless BMS for EV market size is predicted to grow from US$ 77.2 million in 2025 to US$ 219 million in 2031; it is expected to grow at a CAGR of 19.0% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

A Wireless BMS for EVs is an advanced battery monitoring and control solution that eliminates the need for traditional wired connections between battery modules and the BMS. It uses wireless communication technologies (RF, Bluetooth, or proprietary protocols) to monitor, balance, and protect the high-voltage battery pack in electric vehicles (EVs) and hybrid vehicles (HEVs/PHEVs).

United States market for Wireless BMS for EV is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Wireless BMS for EV is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

Europe market for Wireless BMS for EV is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

Global key Wireless BMS for EV players cover Analog Devices, Inc., LG Innotek, NXP, MARELLI, Visteon Corporation, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2024.

LP Information, Inc. (LPI) ' newest research report, the “Wireless BMS for EV Industry

Forecast" looks at past sales and reviews total world Wireless BMS for EV sales in 2024, providing a comprehensive analysis by region and market sector of projected Wireless BMS for EV sales for 2025 through 2031. With Wireless BMS for EV sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Wireless BMS for EV industry.

This Insight Report provides a comprehensive analysis of the global Wireless BMS for EV landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Wireless BMS for EV portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Wireless BMS for EV market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Wireless BMS for EV and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Wireless BMS for EV.

This report presents a comprehensive overview, market shares, and growth opportunities of Wireless BMS for EV market by product type, application, key manufacturers and key regions and countries.

Segmentation by Type:

Bluetooth

RF Protocols

Others

Segmentation by Application:

BEV

Phev

This report also splits the market by region:

- Americas
  - United States
  - Canada
  - Mexico
  - Brazil
- APAC
  - China
  - Japan
  - Korea
  - Southeast Asia
  - India
  - Australia
- Europe
  - Germany
  - France
  - UK
  - Italy
  - Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

Analog Devices, Inc.

LG Innotek

NXP

MARELLI

Visteon Corporation

Texas Instruments

Key Questions Addressed in this Report
What is the 10-year outlook for the global Wireless BMS for EV market?
What factors are driving Wireless BMS for EV market growth, globally and by region?
Which technologies are poised for the fastest growth by market and region?
How do Wireless BMS for EV market opportunities vary by end market size?
How does Wireless BMS for EV break out by Type, by Application?
