The report requires updating with new data and is sent in 48 hours after order is placed.

The global Wireless EV Charging System market size is predicted to grow from US$ 371 million in 2025 to US$ 1063 million in 2031; it is expected to grow at a CAGR of 19.2% from 2025 to 2031.

The Wireless Charging System for Electric Vehicles market covers Electromagnetic Induction, Magnetic Resonance, etc. The typical players include WiTricity, Elix, Momentum Dynamics, etc.

Wireless charging is a great out of sight, out of mind solution to keep your EV humming along. Much like placing the smartphone on a charging pad each night instead of plugging it in, wireless car charging will fill the vehicle’s battery when park over a charger on the ground beneath it. No need to lift bulky cables out of the boot, and no need to actually have those cables with you in the first place. Just park and charge.

Global EV sales continued strong. A total of 10,5 million new BEVs and PHEVs were delivered during 2022, an increase of +55 % compared to 2021. China and Europe emerged as the main drivers of strong growth in global EV sales. In 2022, the production and sales of new energy vehicles in China reach 7.0 million and 6.8 million respectively, a year-on-year increase of 96.9% and 93.4%, with a market share of 25.6%. The production and sales of new energy vehicles have ranked first in the world for eight consecutive years. Among them, the sales volume of pure electric vehicles was 5.365 million, a year-on-year increase of 81.6%. In 2022, sales of pure electric vehicles in Europe will increase by 29% year-on-year to 1.58 million.
