According to our LPI (LP Information) latest study, the global Wireless Video Surveillance market size was valued at US\$ 1120.8 million in 2023. With growing demand in downstream market, the Wireless Video Surveillance is forecast to a readjusted size of US\$ 3781.8 million by 2030 with a CAGR of 19.0% during review period.

The research report highlights the growth potential of the global Wireless Video Surveillance market. Wireless Video Surveillance are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Wireless Video Surveillance. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Wireless Video Surveillance market.

WVS connects wireless network access points to surveillance equipment, such as cameras, storage devices, and video recorders. This helps in efficient monitoring from a remote location and negates the need for investment in the setting up of network infrastructure. WVS includes components such as digital cameras, mesh network nodes, gateway nodes, backhaul units, servers, and monitoring stations (equipped with surveillance). WVS provides security to critical infrastructure, such as airports and cities, without any additional wiring and maintenance costs. It reduces the installation cost and the cost of hiring professionals to do that work.

According to the report, one of the major drivers for this market is shift from analog to IP

cameras. Several enterprises are shifting toward IP cameras due to the various advantages they offer. The total cost of ownership of IP cameras is much lower than analog cameras, which includes the costs of installation, maintenance, and labor. These cameras are flexible, scalable, and can be easily installed. Hence, they can be adapted to the changing needs of a customer. They can easily be integrated with the existing security devices.
