With growing demand in downstream market, the Women's Sandals is forecast to a readjusted size of US\$ 22210 million by 2030 with a CAGR of 3.7% during review period.

The research report highlights the growth potential of the global Women's Sandals market. Women's Sandals are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Women's Sandals. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Women's Sandals market.

Sandals are an open type of footwear, consisting of a sole held to the wearer's foot by straps going over the instep and, sometimes, around the ankle.

High-heeled sandals are the common type of women sandal. They can be formal or casual- made according to the need of the occasion. Hiking or trekking women sandals are specially designed for trekking or hiking in tropical and hot climate with rubber sole. Sports women sandals are popular for outdoor activities. The open thong is a dressier version of a flip-flop which gives nicer look and shape to feet. Closed toe sandals give support to feet and hide the feet that need a pedicure. Mesh are the ankle strap sandals which are lightweight and look elegant on feet. Gladiator which consists of numerous strap provide great support and give a modern touch. Open-toe women sandals are good for those who have sweaty feet during summer.
