The global Wood Chip Biomass Boilers market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Wood chip biomass boilers are similar to other gasifying outdoor wood pellet stoves in that they efficiently burn fuel to heat large spaces through radiant heating or forced air systems. Because they are built to established standards, wood chip biomass boilers are a fully automated replacement for oil or gas heating systems.

The demand for coffee filter paper has increased substantially over the past few years owing to the rising popularity of coffee as an everyday beverage. The steady demand for coffee filter paper is good news for producers, as coffee consumption is growing not only in developed regions such as North America and Europe, but also in emerging markets such as South and East Asia. The International Coffee Organization reported that global coffee consumption rose by 1.3% in the 2020-22 financial year as social distancing measures were implemented. To promote sustainability, there is an increasing demand for paper packaging, thereby boosting the sales volume, increasing penetration and easy availability of coffee filter paper owing to the expanding development of organized retail. Emerging markets such as Brazil and India are expected to be major coffee filter paper manufacturing hubs owing to increasing coffee production.
