A wooden walker is a traditional type of baby walker made primarily of wood. It usually consists of a sturdy wooden frame with four wheels and a handlebar. Wooden walkers are designed to provide support and stability for infants and toddlers as they learn to walk. They often have a simple, classic design without additional features or decorations, although some may include interactive elements or activities to engage the child. Wooden walkers are appreciated by many parents for their durability, eco-friendliness, and aesthetic appeal. They can be a timeless and sustainable choice for aiding a child's early developmental stages.

The global Wooden Walker market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
