Walking canes, which are also known simply as canes or walking sticks, are devices designed to aid individuals in maintaining balance and stability while walking. These assistive tools typically consist of a straight or slightly curved shaft with a handle at the top, providing support to the user. Walking canes are commonly used by people with mobility challenges, such as the elderly or those recovering from injuries or surgeries. It is employed to reduce the risk of falls, improve posture, and alleviate pressure on joints. Moreover, walking canes are available in various designs, materials, and features, including foldable options for portability, adjustable heights to accommodate different users, and ergonomic handles for enhanced comfort. In addition, some of the walking canes are basic and utilitarian while others are crafted for aesthetic appeal, making them functional accessories for everyday use. Wooden Canes can be made of virtually any sturdy material, such as walnut, oak, and other wood.

The global Wooden Walking Canes market size is projected to grow from US\$ 1226 million in 2024 to US\$ 1640 million in 2030; it is expected to grow at a CAGR of 5.0% from 2024 to 2030.
