The global X-ray Non-destructive Testing Equipment market size is predicted to grow from US\$ 1563 million in 2025 to US\$ 2272 million in 2031; it is expected to grow at a CAGR of 6.4% from 2025 to 2031.

Non-destructive testing, NDT is all about testing materials without breaking them. X-ray imaging is the most ideal method to get a high quality picture of the inside of a material. X-Ray non-destructive testing (NDT) equipment is used to inspect an object for internal defects, abnormalities, pore, and other inconsistencies without destroying it. Because NDT does not permanently alter the article being inspected, it is a highly valuable technique that can save both money and time in product evaluation, troubleshooting, and research.

Global X-ray Non-destructive Testing Equipment key players include Zeiss, Fujifilm, General Electric, Shimadzu, Comet Group, etc. Global top five manufacturers hold a Production Market Share over 40%. Japan accounts for the most Production Market Share, which have a share over 25%, followed by North America. In terms of product, Portable Non-destructive Testing Equipment is the largest segment, with a Production Market Share over 65%. And in terms of application, the largest application is Auto Industry, followed by Petroleum and Natural Gas Industry. The non-destructive testing (NDT) market is anticipated to witness robust growth owing to several factors, such as increased emphasis on safety, integrity, and reliability, expansion of the power generation sector, technological advancements like AL, ML, industry 4.0, industrial IoT, and an upsurge in manufacturing activities. Furthermore, increased oil and gas, construction projects, and rising defense expenditures of various countries create

significant demand for NDT equipment and services. Further, rising sales of electric vehicles and autonomous cars fuel demand for non-destructive testing equipment and services in the automotive sector.
