The global XBC Cells market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

XBC cells refer to IBC cells and cells combined with TOPCon, HJT and other technologies on the basis of IBC. They are a type of cross-back contact solar cell. It moves the positive and negative metal contacts of the solar cell to the back of the cell to reduce the shielding of the grid lines on the sunlight, thereby improving the conversion efficiency. Photovoltaic silicon-based cell technology has evolved from BSF to PERC, which is the current mainstream technology, but its theoretical conversion efficiency has reached its upper limit. New technologies such as TOPCon, HJT, and XBC have gradually emerged, with higher conversion efficiency. Among them, the structure of XBC cells can be superimposed with multiple technologies such as PERC, TOPCon, and HJT, and is expected to become a silicon-based cell platform technology. It is expected to become a mainstream technology in the next 5-6 years. In the XBC market, international companies started early and have first-mover advantages; Chinese companies have made rapid progress in the XBC field, and some have achieved mass production. At present, XBC technology has problems such as high production difficulty and high cost, and it is necessary to continue to develop processes suitable for mass production. In the future, with the increase in the penetration rate of TOPCon and HJT cells, XBC cell technology is expected to develop rapidly.

United States market for XBC Cells is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for XBC Cells is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for XBC Cells is estimated to increase from US\$ million in 2025 to US\$

million by 2032, at a CAGR of % from 2026 through 2032.

Global key XBC Cells players cover SunPower, LONGi, AikoSolar, SPIC Solar, Valoe, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
