SMC (Sheet Molding Compound) is a material used to manufacture composite parts. SMC sheet is a sheet material made of SMC material through molding. It is usually composed of resin, glass fiber and other reinforcing materials. When manufacturing SMC sheets, fiber materials, usually glass fibers, need to be added to enhance the strength and rigidity of the material. The glass fiber used to make SMC sheets is usually specially treated yarn, called yarn for SMC sheets. SMC sheet yarns can be made of different types and lengths of glass fibers as needed to meet the strength, hardness and other performance requirements of different parts. By adding an appropriate amount of glass fiber yarn to the SMC material, the structural performance of the composite material can be effectively enhanced, giving the parts better durability and load-bearing capacity.
