The global Yttrium Disilicide market size is predicted to grow from US\$ 13.50 million in 2025 to US\$ 29.59 million in 2032; it is expected to grow at a CAGR of 11.9% from 2026 to 2032.

In 2025, global sales volume of Yttrium Disilicide was approximately 15 tons, with an average global market price of about USD 920/kg. Gross margins of major industry producers were generally in the range of 30%-45%.

Yttrium Disilicide is a rare-earth metal silicide material with the molecular formula YSi_2 and CAS No. 12067-55-9. The product is typically supplied as grey or silver-grey powder, bulk material or sputtering target, featuring a relatively high melting point, good high-temperature stability, electrical conductivity and oxidation-resistance potential. Compared with ordinary silicon powder or yttrium oxide, Yttrium Disilicide is characterized by the combined features of rare-earth elements and silicide structure. Its technical value is mainly reflected in high-purity preparation, phase composition control, particle size control, low-oxygen and low-impurity control, and target forming capability.

Its upstream mainly includes yttrium metal, silicon powder, inert gases, vacuum melting consumables, milling media and packaging materials. The midstream typically involves the preparation of powder, bulk material or sputtering targets through vacuum melting, powder metallurgy, mechanical crushing, air classification and sintering forming processes, with purity, particle size, oxygen content and metal impurities controlled according to electronic-grade or industrial-grade requirements. End-use applications mainly include aerospace, electronics and semiconductors, new energy photovoltaics, high-temperature industry and customized research materials. Overall, the product is a small-volume specialty material, with market value primarily concentrated in high-purity powder preparation, composition stability, particle size consistency, high-temperature performance and customized delivery capability.

United States market for Yttrium Disilicide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Yttrium Disilicide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
