With growing demand in downstream market and recovery from influence of COVID-19 and the Russia-Ukraine War, the Yttrium Nitride is forecast to a readjusted size of US\$ million by 2029 with a CAGR of % during review period.

The research report highlights the growth potential of the global Yttrium Nitride market. With recovery from influence of COVID-19 and the Russia-Ukraine War, Yttrium Nitride are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Yttrium Nitride. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Yttrium Nitride market.

Yttrium nitride is hard ceramic material similar to titanium nitride and zirconium nitride. The nitrides of lanthanum, scandium, and yttrium show semiconducting properties and additionally the lattice structure of YN differs only by 8% from that of gallium nitride. This makes YN a possible buffer layer between a substrate and the GaN layer during GaN crystal growth.
