Zeaxanthin is a pigment found in plants which is responsible for the color of fruits and vegetables, these pigments are often regarded as carotenoids and are often found in formulations for eye-care. Zeaxanthin is one the most abundantly found carotenoids, main sources of zeaxanthin include spinach, kale, green peas, sweet corn among others.

Owing to the apparent eye and cardiovascular health benefits, zeaxanthin is actively added by most of the nutraceutical companies in their multivitamin formulations. Other companies have specifically targeted the eye health segment and offer products exclusively for eye such as Ocuvite, which is a special eye vitamin by Bausch & Lomb Incorporated (suppliers of eye health products).
