Zeolite powder is used widely by livestock farmers as an animal feed additive for beef cattle, dairy cows, swine, poultry (broilers & egg production), and sheep. Since zeolite is the world?s only naturally occurring, negatively charged, mineral a great number of benefits in the feed process can result from the basic chemistry of the zeolite as an animal feed additive.The introduction of zeolite as an animal feed additive provides many rewards such as improved animal growth and weight gain by increased food conversion rate efficiencies. Zeolite is also a rumen buffer for the total digestive tract of high-performance dairy cattle. It can help with the reduction of scours, acidosis, diarrhea, enteritis, and other gastrointestinal diseases.Zeolite has a strong affinity for ammonium which aids in digestion and nutrient absorption and improves the value of milk, gradable eggs, and the meat index. It also improves the dispersion of feed ration ingredients by reducing agglomeration. Other benefits include better phosphate utilization, reduced acidosis, improved bone growth, and reduced mortality.
