Zero Defects Manufacturing (ZDM) represents a transformative approach to quality assurance and control in manufacturing, aiming to eliminate defects and waste throughout a product's entire lifecycle.

By leveraging advanced technologies such as Artificial Intelligence (AI), the Internet of Things (IoT), and Big Data, ZDM ensures that products are manufactured "right first time," reducing costs, enhancing efficiency, and minimising environmental impact.

As industry becomes increasingly digital, and cyber-physical production systems in manufacturing processes become increasingly important, ZDM is more than a methodology – it's a paradigm shift for manufacturers towards intelligent, autonomous, and adaptive systems capable of monitoring, predicting, and resolving quality issues in real time.

By integrating human expertise and machine intelligence, ZDM not only addresses current challenges in manufacturing but also paves the way for a sustainable and resilient industrial future.
