Zero-expansion silica bricks are also called fused silica bricks or thermal shock-resistant silica bricks. The coke oven has the characteristics of extremely low thermal expansion coefficient, excellent resistance to rapid cooling and rapid heating, good high temperature structural strength, and high SiO<sub>2</sub> content. This product can be widely used in rapid thermal repair projects of various coke ovens. The product does not crack and peel off during use, and its low thermal expansion performance is close to zero, so that the long-term use of the coke oven is safe and reliable after repair.
