ZigBee gateway supports multiple door locks and multiple user-defined classification management. Compared with the situation where the smart lock management interface can only display the user serial number and cannot customize the user name, the ZigBee gateway can not only manage multiple smart locks in the home on the mobile phone, but also customize the room name and the corresponding smart lock. The picture can also automatically synchronize the user information entered in each smart lock. All the user information entered in the smart lock can be customized to set the name, and the unlock method entered by each user can be subdivided and recorded. Fingerprint, password, MFE card, or key.

The ZigBee gateway is on standby 24/7 and senses the door lock status at any time. After the user downloads the mobile app and matches the ZigBee gateway, no matter which city you are in, you can instantly obtain the usage of the Indylon smart lock through the app, helping you to grasp the usage of the door lock and the security status of your home in time, and respond to abnormal conditions. Respond to the situation as soon as possible.
