The global Zinc Chromate Primers market size is predicted to grow from US$ 1418 million in 2025 to US$ 1967 million in 2032; it is expected to grow at a CAGR of 4.9% from 2026 to 2032.

In 2024, global production of Zinc Chromate Primers reached approximately 730 kilotons, with an average global market price of around USD 1900 per ton. Zinc Chromate Primers are corrosion-resistant coatings formulated with zinc chromate, a yellow-green inorganic compound that provides strong anti-rust and anti-oxidation protection for metals such as steel and aluminum. These primers act as a base layer applied before paint or other finishes, enhancing adhesion while protecting substrates from moisture, salt, and harsh environmental conditions. Due to their excellent durability and resistance to corrosion, zinc chromate primers have historically been widely used in the aerospace, automotive, marine, and industrial sectors, though their use has declined in recent years because of environmental and health concerns associated with hexavalent chromium compounds.

United States market for Zinc Chromate Primers is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
