## Abstracts

The global Zirconia Toughened Mullite Ceramics market size is predicted to grow from US\$ 877 million in 2025 to US\$ 1448 million in 2032; it is expected to grow at a CAGR of 7.5% from 2026 to 2032.

In 2025, global Zirconia Toughened Mullite Ceramics production reached approximately 30k units, with an average global market price of around US\$30k per unit.

Zirconia Toughened Mullite (ZTM) is a multiphase ceramic material in which a mullite ( $\text{Al}_2\text{O}_3\text{-SiO}_2$ ) matrix is reinforced by dispersed zirconia particles, typically tetragonal  $\text{ZrO}_2$ . The key mechanism is transformation toughening, where stress-induced phase transformation of zirconia inhibits crack propagation, significantly improving the inherent brittleness of mullite. As a result, ZTM combines high-temperature stability, excellent thermal shock resistance, and enhanced strength and fracture toughness, making it suitable for high-temperature structural components, wear parts, engine components, and refractory linings.

The upstream of the ZTM ceramic industry includes alumina, silica sources (such as kaolin and silica sand), zirconia powders, stabilizers (e.g.,  $\text{Y}_2\text{O}_3$ ,  $\text{CeO}_2$ ), and processing equipment suppliers. The midstream consists of advanced ceramic and refractory manufacturers responsible for powder formulation, shaping (isostatic pressing, slip casting, gelcasting), and high-temperature sintering. Downstream applications are concentrated in metallurgical industries (steel, glass furnaces), energy equipment (gas turbines, diesel engine components), wear-resistant machinery parts, and high-temperature chemical equipment. Representative upstream players include Tosoh, Saint-Gobain, and Imerys, while downstream users include Siemens Energy, GE, and major metallurgical companies. The industry is characterized by material-

driven upstream, process-intensive midstream, and high-temperature application-driven demand.

United States market for Zirconia Toughened Mullite Ceramics is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
