Heavy duty benting chain is a type of chain designed specifically for carrying heavy loads, widely used in industrial environments that require high strength, durability, and stability. This type of chain is typically used in high load, high-strength conveyor systems and can operate stably under extreme working conditions. The heavy-duty bent plate chain adopts welding technology to connect the chain links. This structure not only improves the load-bearing capacity of the chain, but also ensures its long-term stable operation. Even in high load environments, it is not easy to break or deform.
