The global Herba Lycopodii Extract market size is predicted to grow from US\$ 23.14 million in 2025 to US\$ 36.69 million in 2032; it is expected to grow at a CAGR of 6.8% from 2026 to 2032.

In 2024, the global production of Herba Lycopodii Extract was approximately 430 tons, with an average selling price of about US\$55 per kilogram. The production capacity in 2024 was 650 tons, with an average gross profit margin of approximately 20-30%. Herba Lycopodii Extract is a natural product extracted from the whole plant of *Huperzia serrata*, possessing effects such as relaxing muscles and tendons, dispelling wind and dampness, and reducing swelling and pain. It is mainly used to treat conditions such as rheumatic paralysis, joint pain, and bruises. Its pharmacological effects include anti-inflammatory, analgesic, and antioxidant properties, and it can also affect the central nervous system and smooth muscle function.

The upstream direct raw material for Herba Lycopodii Extract is solely the medicinal plant *Huperzia serrata* (the dried whole plant of *Huperzia serrata*, a plant of the Lycopodiaceae family). Downstream applications are highly focused on research and high-end development fields, mainly including life science research institutions and pharmaceutical companies (using its high-purity huperzine alkaloids as tool compounds or drug lead compounds for neuropharmacological research), and a few high-end dietary supplement brands (using its standardized extract in specialized products targeting neurological health and cognitive function).

Herba Lycopodii Extract has received increasing attention in the global market in recent years, primarily used in areas such as joint health, anti-inflammation, and promoting blood circulation. Herba Lycopodii is widely used in traditional Chinese medicine to

relieve joint pain, reduce inflammation, and improve circulation, thus creating significant market demand for its extract in health supplements, pharmaceuticals, and functional foods. With the growing global consumer interest in natural herbal products and healthy lifestyles, the market prospects for Herba Lycopodii Extract are very promising.

China and Southeast Asia are the main consumer markets for Huperzia serrata extract. With the spread of traditional Chinese medicine culture, the European and American markets are also gradually accepting and using this ingredient, especially given the increasing demand for joint health products in aging societies. Particularly among the elderly population, Herba Lycopodii Extract, as a natural joint health ingredient, is gaining favor with more and more consumers.

However, the market also faces some challenges, such as ensuring a stable supply of raw materials, standardizing product quality, and increasing consumer awareness. In the future, with more clinical research and enhanced consumer education, Herba Lycopodii Extract is expected to gain a larger share in the global market. Overall, the application of Huperzia serrata extract in health supplements, pharmaceuticals, and other natural therapeutic fields will continue to grow, and more development opportunities are expected in the coming years.
