The global Horticultural Lighting Solution market size is predicted to grow from US\$ 82.85 million in 2025 to US\$ 112 million in 2032; it is expected to grow at a CAGR of 4.5% from 2026 to 2032.

The horticultural lighting solutions market has been experiencing significant growth and is expected to continue to do so in the coming years. This trend can be attributed to several factors: Increasing demand for controlled environment agriculture (CEA): Controlled environment agriculture, including vertical farming and greenhouse cultivation, is gaining popularity due to its ability to produce high-quality crops year-round with reduced water consumption and pesticide use. Horticultural lighting solutions play a crucial role in CEA by providing the necessary light spectrum and intensity for optimal plant growth and development.
