The global Multi-axis Horizontal Machining Center market size is predicted to grow from US$ 1557 million in 2025 to US$ 2131 million in 2031; it is expected to grow at a CAGR of 5.4% from 2025 to 2031.

The multi-axis horizontal machining center is a high-precision, high-efficiency CNC machine tool, mainly used for the processing of complex parts. Its spindle is arranged horizontally, and the workpiece is fixed on the workbench. Through multi-axis linkage (usually including X, Y, Z axis and rotation axis), multi-angle and multi-faceted processing is achieved. Compared with the vertical machining center, the horizontal design is more suitable for processing large and heavy workpieces, and the chips are easier to discharge, which improves the processing efficiency and accuracy. The multi-axis horizontal machining center is widely used in aerospace, automobile manufacturing, energy equipment, mold manufacturing and other fields, and is particularly suitable for processing complex surfaces, deep holes and high-precision parts.

United States market for Multi-axis Horizontal Machining Center is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Multi-axis Horizontal Machining Center is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

Europe market for Multi-axis Horizontal Machining Center is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.
