Abstracts

The global Personal Travel Systems market size is predicted to grow from US$ 119 million in 2025 to US$ 164 million in 2032; it is expected to grow at a CAGR of 4.8% from 2026 to 2032.

A travel system refers to a pushchair that allows you to remove the seat unit and replace it with a car seat. This means you can move baby from your car to the pushchair chassis without having to unclip them from their car seat ? it's ideal for saving time and effort if you're in and out of the car a lot.

With increasing concerns about climate change and environmental sustainability, there is a growing trend towards eco-friendly transportation alternatives. Electric skateboards, being powered by electric motors and not relying on fossil fuels, provide a greener and more sustainable mode of transportation for short distances. The emphasis on environmental consciousness drives the demand for electric skateboards. Electric skateboards serve as an efficient solution for urban mobility, particularly for short distances and last-mile connectivity. They are compact, lightweight, and agile, allowing riders to navigate through crowded city streets and reach their destinations quickly. The convenience and flexibility offered by electric skateboards make them an appealing option for urban commuters and individuals seeking alternative transportation methods. Continuous advancements in technology have significantly improved the design, performance, and safety features of electric skateboards. Integrated electronic systems, brushless motors, regenerative braking, and smart connectivity options enhance the overall riding experience and user convenience. Technological innovations in battery technology, such as longer battery life and faster charging, further contribute to the market growth. The rising popularity of electric vehicles in general has a positive influence on the electric skateboard market. As people become more familiar with the

concept of electric-powered transportation, they are more likely to consider electric skateboards as a viable alternative for short trips. The overall growth and acceptance of electric vehicles create a favorable environment for the electric skateboard market to thrive. The growing interest in active and outdoor lifestyles, including recreational activities, has contributed to the increased demand for electric skateboards. Electric skateboards provide a fun and exhilarating way to explore the outdoors, engage in physical activity, and enjoy recreational riding. The desire for adventure, enjoyment, and a unique riding experience drives the market for electric skateboards. The influence of social media platforms and digital influencers plays a significant role in shaping consumer preferences and trends. Influencers who promote electric skateboards through social media platforms attract attention and generate interest among their followers. The exposure and positive portrayal of electric skateboards through influencer marketing contribute to increased awareness and demand for these products. Electric skateboards offer a cost-effective and convenient mode of transportation compared to traditional vehicles. They require less maintenance, have lower operating costs, and are often more affordable than cars or motorcycles. Additionally, electric skateboards can bypass traffic congestion, providing a time-saving advantage for riders. The cost-effectiveness and convenience associated with electric skateboards drive their adoption in the market.

LP Information, Inc. (LPI) ' newest research report, the ?Personal Travel Systems Industry Forecast? looks at past sales and reviews total world Personal Travel Systems sales in 2025, providing a comprehensive analysis by region and market sector of projected Personal Travel Systems sales for 2026 through 2032. With Personal Travel Systems sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Personal Travel Systems industry.

This Insight Report provides a comprehensive analysis of the global Personal Travel Systems landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Personal Travel Systems portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms? unique position in an accelerating global Personal Travel Systems market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Personal Travel Systems and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Personal Travel Systems Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Personal Travel Systems by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Personal Travel Systems by Country/Region, 2021, 2025 & 2032
2.2 Personal Travel Systems Segment by Type
  2.2.1 Skateboard Controller
  2.2.2 Scooter Controller
  2.2.3 Electric Moped Controller
  2.2.4 Accessories
  2.2.5 Personal Travel Systems Sales by Type
    2.2.5.1 Global Personal Travel Systems Sales Market Share by Type (2021-2026)
    2.2.5.2 Global Personal Travel Systems Revenue and Market Share by Type (2021-2026)
    2.2.5.3 Global Personal Travel Systems Sale Price by Type (2021-2026)
2.3 Personal Travel Systems Segment by Application
  2.3.1 Electric Skateboard
  2.3.2 Electric Scooter
  2.3.3 Electric Bike
  2.3.4 Personal Travel Systems Sales by Application
    2.3.4.1 Global Personal Travel Systems Sale Market Share by Application (2021-2026)
