A prosthetic adapter is a component or device used in the field of prosthetics to connect a residual limb (the remaining part of a limb after amputation) to a prosthetic device (artificial limb). It serves as an interface between the user's body and the prosthetic limb, facilitating a secure and functional attachment.

Advances in technology, such as 3D printing and scanning, were enabling the creation of highly personalized and customized prosthetic adapters. Tailoring these components to the individual's anatomy and functional needs can enhance comfort and performance.
