Racing slalom skis usually use high-performance materials such as carbon fiber reinforcements, titanium alloy layers, and high-density wood cores to improve rigidity, stability, and energy transfer efficiency. In addition, the bottom of the board is equipped with a high-quality graphite sliding surface to ensure the best sliding speed in different snow conditions. This type of ski is mainly used for FIS (International Ski Federation) slalom competitions or other high-level competitive events, and is suitable for experienced skaters or professional athletes.
