The global Radix Peucedani Extract market size is predicted to grow from US\$ 24.95 million in 2025 to US\$ 38.51 million in 2032; it is expected to grow at a CAGR of 6.4% from 2026 to 2032.

In 2025, the global production of Radix Peucedani Extract is approximately 750 tons, with an average selling price of about US\$34 per kilogram. The production capacity in 2025 is 980 tons, with an average gross profit margin of approximately 20-30%. Radix Peucedani Extract is a natural product extracted from the roots of the traditional Chinese medicine herb *Peucedanum praeruptorum*. Its main components include coumarins, saponins, and volatile oils. It has expectorant, antipyretic, and phlegm-reducing effects, and is clinically used to treat symptoms such as colds, upper respiratory tract infections, and cough with excessive phlegm.

The upstream core raw material for Radix Peucedani Extract is dried *Peucedanum praeruptorum* roots that meet the standards of the Chinese Pharmacopoeia. These roots are primarily sourced from standardized cultivation of specific varieties (such as **Peucedanum praeruptorum* var. *album**) to ensure the stability and controllability of its key active components for cough and phlegm relief (such as coumarin compounds). Downstream applications are highly concentrated in the traditional Chinese medicine industry, where it is used as a standardized raw material for the standardized production and development of cough and asthma-relieving traditional Chinese medicines, classic traditional Chinese medicine compound preparations, traditional Chinese medicine formula granules, and novel traditional Chinese medicine health products.

Radix Peucedani Extract is derived from the traditional Chinese medicinal herb *Peucedanum praeruptorum* and is primarily used to regulate the respiratory system,

relieve cough and phlegm, and for its anti-inflammatory and antioxidant properties. With the spread of traditional Chinese medicine culture and the increasing consumer demand for natural, side-effect-free health products, the application of Peucedanum praeruptorum extract in the global market is gradually expanding, particularly in the fields of respiratory health, immune regulation, and anti-aging, attracting increasing attention. As a component of traditional Chinese medicine, Radix Peucedani Extract has become an important ingredient in health foods, herbal medicines, and cosmetics due to its wide range of pharmacological effects.

In the health supplement sector, Radix Peucedani Extract is widely used to improve lung health, relieve coughs, and clear phlegm, showing particularly good results in addressing seasonal respiratory illnesses and allergic diseases. With the increasing global consumer preference for natural plant-based products, the demand for Radix Peucedani Extract is steadily rising in the European, American, and Asian markets, especially in its application in health and functional foods.

As people's attention to respiratory health continues to grow, the market for Radix Peucedani Extract will continue to expand, particularly in the Asian and North American markets. Furthermore, with the modernization of traditional Chinese medicine and the deepening of scientific research, the diverse effects of Radix Peucedani Extract will provide more opportunities for its promotion in the global market, leading to a promising future and steady market growth.
