The global Residential EV Charging market size is predicted to grow from US$ 4027 million in 2025 to US$ 10750 million in 2032; it is expected to grow at a CAGR of 15.4% from 2026 to 2032.

Residential Electric Vehicle (EV) Charging solutions cater to homeowners who own electric vehicles and require a convenient and efficient way to recharge them at home. These systems include charging stations or equipment that can be installed in residential garages or outdoor spaces, allowing EV owners to charge their vehicles overnight or during downtime, reducing reliance on public charging infrastructure and promoting EV adoption.

Global EV sales continued strong. A total of 10,5 million new BEVs and PHEVs were delivered during 2022, an increase of +55 % compared to 2021. China and Europe emerged as the main drivers of strong growth in global EV sales. In 2022, the production and sales of new energy vehicles in China reach 7.0 million and 6.8 million respectively, a year-on-year increase of 96.9% and 93.4%, with a market share of 25.6%. The production and sales of new energy vehicles have ranked first in the world for eight consecutive years. Among them, the sales volume of pure electric vehicles was 5.365 million, a year-on-year increase of 81.6%. In 2022, sales of pure electric vehicles in Europe will increase by 29% year-on-year to 1.58 million.
