The global Restriction Endonucleases Products market size is predicted to grow from US$ million in 2025 to US$ million in 2032; it is expected to grow at a CAGR of %from 2026 to 2032.

Restriction endonucleases are also referred to as "restriction enzymes." Restriction endonucleases are enzymes that cleave the DNA within or adjacent to a specific DNA sequence known as a restriction site. Each restriction enzyme is only capable of recognizing or identifying a single or a few restriction sites. Once these enzymes have identified and bound to the restriction sites, they cut the DNA at or near these sites.
