The global Retatrutide market size is predicted to grow from US\$ 1348 million in 2025 to US\$ 4578 million in 2032; it is expected to grow at a CAGR of 18.5% from 2026 to 2032.

Retatrutide is a clinical-stage, multi-agonist peptide drug candidate targeting GLP-1, GIP, and glucagon receptors and is being developed for obesity, metabolic syndrome, and type 2 diabetes, with early data demonstrating substantial potential in weight reduction and metabolic improvement. As the product has not received marketing approval, no commercial production or sales existed in 2025; global commercial capacity is effectively zero. Limited quantities of GMP-grade API were manufactured for clinical studies—estimated at 3.2 kg—while research-grade peptide supplied to academic and preclinical users totaled an estimated 38 kg. With research-grade Retatrutide priced at approximately USD 340 per mg (USD 340,000 per g), the research-use market in 2024 is valued at USD 1.292 billion; GMP-grade API, estimated at USD 27,000 per gram, adds approximately USD 86.4 million, yielding a total addressable 2025 market (research + clinical materials) of USD 1.378 billion. Upstream inputs include protected amino acids, solid-phase peptide synthesis resins, coupling reagents, purification media, and analytical systems, while downstream demand arises from the originator company, clinical research sites, CRO/CDMO partners, and academic metabolic-disease laboratories. Given accelerating global demand for GLP-1-based therapies and sustained expansion in obesity treatment, Retatrutide holds substantial future commercial potential and is expected to drive significant growth across peptide manufacturing, sterile-fill capacity, and medical weight-management ecosystems upon approval.

United States market for Retatrutide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Retatrutide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Retatrutide is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Global key Retatrutide players cover Eli Lilly, Fujian Genohope Biotech, Shaanxi TNJONE Pharmaceutical, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2025.
