The upstream raw materials for Burnet extract primarily consist of the specific medicinal plant Sanguisorba officinalis, whose saponin and tannin content and quality are of core value. Downstream applications focus on high-value, high-end functional skincare and cosmeceutical products, where it serves as a key active ingredient for anti-inflammatory, soothing, repairing, and astringent effects. It is also used in dietary supplements and a small number of oral care and topical medical dressing products, meeting the market demand for natural, safe, and scientifically proven plant-derived functional ingredients.

Sanguisorba officinalis extract, a traditional Chinese herbal extract, has been gaining increasing attention in the global market in recent years, especially against the backdrop of the growing popularity of health products and natural therapies.
