## Abstracts

The global Semen Pruni Extract market size is predicted to grow from US\$ 16.09 million in 2025 to US\$ 24.67 million in 2032; it is expected to grow at a CAGR of 6.3% from 2026 to 2032.

In 2025, the global production of Semen Pruni Extract is approximately 470 tons, with an average selling price of about US\$35/kg. The production capacity in 2025 is 620 tons, with an average gross profit margin of approximately 20-35%. Semen Pruni Extract is extracted from the seeds of *Prunus humilis* and has the effects of moisturizing dryness, promoting bowel movements, relieving gas, and promoting diuresis. It is mainly used to treat symptoms such as dryness of the intestines, food stagnation, abdominal distension, constipation, edema, beriberi, and difficulty in urination. In addition, it also has effects such as lubricating the intestines and relieving constipation, promoting diuresis and reducing swelling, promoting blood circulation and reducing swelling, and relieving gas and promoting digestion.

The core upstream raw material of Semen Pruni Extract is the dried mature seeds of *Prunus humilis*, a plant of the Rosaceae family, and its quality is directly affected by variety, origin, and processing methods. Downstream applications are highly concentrated in traditional Chinese medicine and health products for relieving constipation (such as classic prescriptions like Ma Ren Wan). There are extremely limited exploratory applications in functional foods (specific intestinal health products) and pharmaceutical research (specific research based on amygdalin). It is a niche field driven by traditional formulas and strictly regulated by toxicity regulations of active ingredients.

Semen Pruni Extract, derived from the seeds of *Prunus humilis*, is a widely used plant extract in traditional Chinese medicine. It possesses certain pharmacological activities and is primarily used to treat constipation, reduce inflammation, and promote intestinal

health. In recent years, with the increasing consumer interest in natural health products and plant extracts, the market demand for Semen Pruni Extract has grown steadily. Especially in the health supplement, pharmaceutical, and cosmetics industries, Semen Pruni Extract has become a popular ingredient due to its natural, safe, and multi-functional characteristics.

In the health supplement sector, Semen Pruni Extract is widely used in intestinal health products, constipation relief agents, and anti-inflammatory medications. With increasing awareness of intestinal health and constipation issues, the market prospects for Semen Pruni Extract are very promising. Furthermore, its antioxidant and anti-aging properties have also allowed it to gradually gain a foothold in the cosmetics industry, becoming an important ingredient in some skincare products.

However, the challenges facing the Semen Pruni Extract market mainly include insufficient scientific research on its efficacy and safety, as well as seasonal fluctuations in raw material supply. Nevertheless, with the continuously rising demand for natural ingredients, the Semen Pruni Extract market is expected to continue its growth trajectory in the coming years, especially given its significant potential in natural health products and functional foods.
