A stainless steel swing check valve is a one-way valve designed to prevent backflow in pipelines. It features a hinged disc (swing mechanism) that swings open when fluid flows in the desired direction and automatically closes when flow reverses, preventing contamination, pressure loss, or damage to equipment. The use of stainless steel makes it highly corrosion-resistant, durable, and suitable for high-temperature and high-pressure applications.These valves are widely used in water treatment, oil & gas, chemical processing, steam systems, and food & beverage industries due to their robust construction and long service life.
