Date: October 2026
Pages: 115
Price: US$ 3,660.00 (Single User License)
ID: S57D18B16AF8EN

Abstracts

The global Sunroof Drives market size is predicted to grow from US$ 605 million in 2025 to US$ 837 million in 2032; it is expected to grow at a CAGR of 5.2% from 2026 to 2032.

A Sunroof Drive is a compact electromechanical unit used to move the openable glass panel of a vehicle roof system. A brushed DC or brushless DC motor generates rotary power, which is transmitted through a worm gear, spur gear or comparable reduction mechanism to a cable, flexible shaft or rail assembly, enabling the roof panel to tilt, slide, close and maintain its commanded position. Key engineering requirements include output torque, operating speed, acoustic performance, electromagnetic compatibility, thermal stability, water and dust resistance, service life, package size and functional safety. The product is generally supplied by a specialist motor manufacturer to a roof-system Tier 1, which incorporates it into the complete roof module before delivery to the vehicle manufacturer.

Key Findings

Global Sunroof Drive shipments reached 47.24 million units in 2025

The global average selling price was approximately US$13.1 per unit in 2025

Market Trends

The Sunroof Drive market is shifting from conventional brushed motor supply toward more integrated mechatronic solutions combining gear reduction, position sensing, anti-pinch control, diagnostics and vehicle-network communication. Brushed DC motors remain dominant in cost-sensitive and high-volume vehicle programs because of their mature manufacturing process and competitive cost, while brushless motors are gaining

+357 96 030922
info@marketpublishers.com

attention in premium vehicles, electric vehicles and applications requiring lower noise, longer service life and higher efficiency. Product development is increasingly focused on compact packaging, reduced mass, improved acoustic performance and standardized drive platforms that can be adapted across multiple roof architectures. At the same time, the rapid adoption of fixed panoramic glass roofs is changing the product mix rather than eliminating roof-motor demand. Fixed roofs reduce demand for glass-opening motors but create additional opportunities for powered shade motors, particularly in electric vehicles where thermal comfort and cabin temperature management have become more important. The long-term market direction is therefore characterized by moderate volume growth, a rising share of powered shade applications and gradual improvement in average product value through greater electronic integration.

Market Dynamics

Drivers

Growth is supported by the increasing penetration of panoramic roof systems, higher SUV and crossover production, rising consumer demand for cabin openness and comfort, and the continued migration of sunroofs from optional equipment to standard equipment on mid- and high-grade vehicle versions. Electric vehicles are an important demand contributor because manufacturers frequently use large glass roofs to strengthen interior differentiation and perceived vehicle value. Larger roof areas also increase the need for powered shades to control sunlight, heat load and passenger comfort. On the supply side, greater use of Hall sensors, integrated controllers, LIN communication and anti-pinch functions increases the value of each drive unit and supports revenue growth even when vehicle production expands slowly.

Restraints

The market faces significant price pressure from vehicle manufacturers and roof-system Tier 1 suppliers, particularly for mature brushed motor platforms. Fixed panoramic glass roofs without movable panels reduce the addressable volume of glass-drive motors, while manual shades, coated glass and switchable glazing can reduce demand for powered shade motors. Automotive qualification requirements are lengthy, and suppliers must demonstrate performance in noise, electromagnetic compatibility, durability, temperature cycling, water resistance and functional safety before entering a vehicle platform. These requirements increase development costs and limit the ability of small motor manufacturers to compete directly in global programs. Vehicle architecture

+357 96 030922
info@marketpublishers.com

simplification and continuous cost reduction also place pressure on margins throughout the supply chain.

Opportunities

The strongest opportunities are concentrated in intelligent drive systems, brushless platforms, low-noise gear mechanisms and integrated motor-controller products. Suppliers capable of combining motor design, gear engineering, embedded electronics, sensing and software control can capture a larger share of the roof-system value chain. China, India and Southeast Asia offer additional localization opportunities as vehicle production expands and regional automakers seek shorter development cycles and lower procurement costs. Powered shades for fixed panoramic roofs represent a particularly attractive growth segment because their demand can increase even when openable sunroof penetration stabilizes. Platform-based products that can serve roof glass, sunshades and adjacent comfort-motion applications also improve scale efficiency and broaden customer coverage.

Challenges

The principal challenge is balancing cost, reliability and functional integration. Sunroof Drive products operate in an environment where gear noise, vibration, temperature variation, moisture ingress and repeated load cycles can directly affect customer satisfaction and warranty costs. Greater electronic integration introduces additional requirements for software validation, cybersecurity, electromagnetic compatibility and communication reliability. Supply relationships are concentrated among a limited number of roof-system integrators and vehicle manufacturers, creating long qualification periods and substantial dependence on individual vehicle platforms. Local suppliers must therefore move beyond low-cost motor manufacturing and establish capabilities in system engineering, automated production, traceability, quality control and global technical support.

Industry Chain Analysis

The upstream supply chain includes copper wire, electrical steel, permanent magnets, carbon brushes, bearings, engineering plastics, stamped metal parts, gear materials, connectors, Hall sensors, semiconductors and electronic control components. Material selection directly affects motor efficiency, acoustic performance, thermal behavior, service life and unit cost. Precision plastic gears, worm shafts and housings are especially important because gear quality and assembly tolerance strongly influence roof-system noise and movement stability. Electronic components represent a growing

+357 96 030922
info@marketpublishers.com

share of value as more products incorporate position sensing, anti-pinch control and network communication.

Midstream participants design and manufacture bare motors, gearmotors and intelligent drive modules, while downstream roof-system Tier 1 suppliers integrate these products with rails, cables, glass panels, shades, seals and control modules before delivery to vehicle manufacturers. Value creation is progressively moving from basic motor manufacturing toward integrated mechanical, electronic and software capabilities. Conventional products remain highly cost competitive, whereas suppliers of validated low-noise gear systems, brushless motors and integrated control modules can achieve higher unit value and stronger customer retention. Long vehicle-platform cycles and strict qualification standards also make engineering capability and supply reliability important components of profitability.

Report Scope

LP Information, Inc. (LPI) ' newest research report, the “Sunroof Drives Industry Forecast” looks at past sales and reviews total world Sunroof Drives sales in 2025, providing a comprehensive analysis by region and market sector of projected Sunroof Drives sales for 2026 through 2032. With Sunroof Drives sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US$ millions of the world Sunroof Drives industry.

This Insight Report provides a comprehensive analysis of the global Sunroof Drives landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Sunroof Drives portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms’ unique position in an accelerating global Sunroof Drives market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Sunroof Drives and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Sunroof Drives.

This report presents a comprehensive overview, market shares, and growth

+357 96 030922

opportunities of Sunroof Drives market by product type, application, key manufacturers and key regions and countries.

Market Segmentation

Segmentation by Type:

DC Brushed Motor

DC Brushless Motor

Segmentation by End User:

Panoramic Sunroof

Conventional Sunroof

Segmentation by Model:

SUV

Sedan

Segmentation by Application:

New Energy Vehicles

ICE Vehicles

This report also splits the market by region:

Americas

United States

Key Questions Addressed in this Report

What is the 10-year outlook for the global Sunroof Drives market?

What factors are driving Sunroof Drives market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Sunroof Drives market opportunities vary by end market size?

How does Sunroof Drives break out by Type, by Application?

+357 96 030922
info@marketpublishers.com

Contents

1 SCOPE OF THE REPORT

1.1 Market Introduction
1.2 Years Considered
1.3 Research Objectives
1.4 Market Research Methodology
1.5 Research Process and Data Source
1.6 Economic Indicators
1.7 Currency Considered
1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview
  2.1.1 Global Sunroof Drives Annual Sales 2021-2032
  2.1.2 World Current & Future Analysis for Sunroof Drives by Geographic Region, 2021, 2025 & 2032
  2.1.3 World Current & Future Analysis for Sunroof Drives by Country/Region, 2021, 2025 & 2032
2.2 Sunroof Drives Segment by Type
  2.2.1 DC Brushed Motor
  2.2.2 DC Brushless Motor
  2.2.3 Sunroof Drives Sales by Type
    2.2.3.1 Global Sunroof Drives Sales Market Share by Type (2021-2026)
    2.2.3.2 Global Sunroof Drives Revenue and Market Share by Type (2021-2026)
    2.2.3.3 Global Sunroof Drives Sale Price by Type (2021-2026)
2.3 Sunroof Drives Segment by End User
  2.3.1 Panoramic Sunroof
  2.3.2 Conventional Sunroof
  2.3.3 Sunroof Drives Sales by End User
    2.3.3.1 Global Sunroof Drives Sales Market Share by End User (2021-2026)
    2.3.3.2 Global Sunroof Drives Revenue and Market Share by End User (2021-2026)
    2.3.3.3 Global Sunroof Drives Sale Price by End User (2021-2026)
2.4 Sunroof Drives Segment by Model
  2.4.1 SUV
  2.4.2 Sedan
  2.4.3 Sunroof Drives Sales by Model

+357 96 030922
info@marketpublishers.com

2.4.3.1 Global Sunroof Drives Sales Market Share by Model (2021-2026)
2.4.3.2 Global Sunroof Drives Revenue and Market Share by Model (2021-2026)
2.4.3.3 Global Sunroof Drives Sale Price by Model (2021-2026)
2.5 Sunroof Drives Segment by Application
2.5.1 New Energy Vehicles
2.5.2 ICE Vehicles
2.5.3 Sunroof Drives Sales by Application
2.5.3.1 Global Sunroof Drives Sale Market Share by Application (2021-2026)
2.5.3.2 Global Sunroof Drives Revenue and Market Share by Application (2021-2026)
2.5.3.3 Global Sunroof Drives Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Sunroof Drives Breakdown Data by Company
3.1.1 Global Sunroof Drives Annual Sales by Company (2021-2026)
3.1.2 Global Sunroof Drives Sales Market Share by Company (2021-2026)
3.2 Global Sunroof Drives Annual Revenue by Company (2021-2026)
3.2.1 Global Sunroof Drives Revenue by Company (2021-2026)
3.2.2 Global Sunroof Drives Revenue Market Share by Company (2021-2026)
3.3 Global Sunroof Drives Sale Price by Company
3.4 Key Manufacturers Sunroof Drives Producing Area Distribution, Sales Area, Product Type
3.4.1 Key Manufacturers Sunroof Drives Product Location Distribution
3.4.2 Players Sunroof Drives Products Offered
3.5 Market Concentration Rate Analysis
3.5.1 Competition Landscape Analysis
3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)
3.6 New Products and Potential Entrants
3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR SUNROOF DRIVES BY GEOGRAPHIC REGION

4.1 World Historic Sunroof Drives Market Size by Geographic Region (2021-2026)
4.1.1 Global Sunroof Drives Annual Sales by Geographic Region (2021-2026)
4.1.2 Global Sunroof Drives Annual Revenue by Geographic Region (2021-2026)
4.2 World Historic Sunroof Drives Market Size by Country/Region (2021-2026)
4.2.1 Global Sunroof Drives Annual Sales by Country/Region (2021-2026)
4.2.2 Global Sunroof Drives Annual Revenue by Country/Region (2021-2026)
4.3 Americas Sunroof Drives Sales Growth

I would like to order

Product name: Global Sunroof Drives Market Growth 2026-2032

Product link: https://marketpublishers.com/r/S57D18B16AF8EN.html

Price: US$ 3,660.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/S57D18B16AF8EN.html
