The global Uncaria Rhynchophylla Extract market size is predicted to grow from US\$ 27.80 million in 2025 to US\$ 40.35 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

In 2025, the global production of Uncaria rhynchophylla extract was approximately 580 tons, with an average selling price of about US\$49 per kilogram. The production capacity in 2025 was 720 tons, with an average gross profit margin of approximately 20-30%. Uncaria rhynchophylla extract is a natural active ingredient extracted from the hooked stems and branches of the Uncaria rhynchophylla plant. It mainly contains various alkaloids, including rhynchophylline, and possesses pharmacological effects such as clearing heat and calming the liver, relieving spasms, sedation, lowering blood pressure, anti-inflammatory, antioxidant, and neuroprotective effects. It is widely used in medicine and health products to treat hypertension, headaches, dizziness, epilepsy, and convulsions, and has potential efficacy against neurodegenerative diseases such as Alzheimer's disease and Parkinson's disease.

The upstream core of the Uncaria rhynchophylla extract industry chain includes Uncaria rhynchophylla raw materials and organic solvents (used for extraction); its downstream directly serves industries with specific requirements for product purity and activity, mainly including modern traditional Chinese medicine and proprietary Chinese medicine preparations, dietary supplements and health foods, functional beverages, and pharmaceutical research institutions. Some high-quality extracts are also used as active pharmaceutical ingredients in the production of antihypertensive and sedative drugs.

Uncaria rhynchophylla extract, a traditional Chinese herbal medicine, has been gaining increasing attention in the global herbal health products and natural medicine market in

recent years. *Uncaria rhynchophylla* extract is primarily used for nervous system health, blood pressure reduction, and calming effects, and is widely used in the treatment of insomnia, hypertension, and other diseases. With the increasing global demand for natural ingredients and herbal health products, particularly in Asian markets (especially China), Europe, and North America, the market for *Uncaria rhynchophylla* extract is steadily growing. China, as a major producer of *Uncaria rhynchophylla*, has driven raw material production and exports, making the global supply chain for *Uncaria rhynchophylla* extract more stable.

In terms of application, *Uncaria rhynchophylla* extract is mainly used in traditional Chinese medicine formulations, dietary supplements, and health foods. As consumers increasingly prefer healthy, natural, and side-effect-free products, the market demand for *Uncaria rhynchophylla* extract is continuously expanding. Especially with the rise of health awareness, more and more consumers are opting for natural alternative medicines, making *Uncaria rhynchophylla* extract an important component of the pharmaceutical and health product market.

Furthermore, with technological advancements, the extraction technology and quality control of *Uncaria rhynchophylla* extract are constantly improving, ensuring product stability and effectiveness. However, the market for *Uncaria rhynchophylla* extract still faces competition from other herbal extracts (such as ginseng and goji berries), and its market penetration rate is relatively low. Therefore, the future market growth of *Uncaria rhynchophylla* extract still depends on brand building and increased consumer awareness.
