Abstracts

Guar gum is widely accepted as an ingredient in wide number of applications, such as oil & gas, food & beverages, mining & explosives, paper manufacturing, pharmaceuticals & cosmetics and many more. Its multifunctional properties increases its adoption in end-use applications. The growing oil & gas industry, especially the shale gas industry, has in turn increased the demand for guar gum, thereby fueling the growth of this Global guar gum market is expected to witness a considerable growth over the forecast period owing to its widespread applications in numerous end-use industries including food & beverage, pharmaceutical, textile, paper, mining and oil & gas industry. The present scenario represents Approx. 712593 MT global consumer quantity, with 1210 global importer and 134 global importer countries. Globally around 289 exporter are dealing with guar gum .Cyamopsis tetragonolobus and psoralioides are the botanical forms of Guar plant whose seeds are processed to separate the endosperm from which Guar gum is obtained. These are leguminous plants and suitable for growing in all seasons including rainy season or in hot summer so, it is called annual plant. It is extracted from the endosperm of these seeds contains carbohydrate with high molecular weight. And this type of crop can be cultivated with good productivity in sandy soils. It is applied for its thickening property and this remains the main application of this product. The presence of edible carbohydrate polymer makes it suitable for adding as a reagent in hydrogen and mineral bonding and even in cellulosic surfaces.

Note: Consumer information would be attached in a separate MS-Excel file.
