Abstracts

Diabetes is a disease that occurs when your blood glucose, also called blood sugar, is too high. Blood glucose is your main source of energy and comes from the food you eat. Insulin, a hormone made by the pancreas, helps glucose from food get into your cells to be used for energy. An estimated *** million people of all ages—or ***% of the U.S. population—had diabetes in 2017 (Methods). Ø This total included ***million adults aged 18 years or older (***% of all U.S. adults), of which ***million (23.8%) were not aware of or did not report having diabetes (Table 1) (Methods). Ø The percentage of adults with diabetes increased with age, reaching a high of 25.2% among those aged 65 years or older (Table 1). Ø Compared to non-Hispanic whites, the age-adjusted prevalence of diagnosed and undiagnosed diabetes was higher among Asians, non-Hispanic blacks, and Hispanics during 2011–2017 An estimated *** million people of all ages—or ***% of the U.S. population—had diabetes in 2017 (Methods). Ø This total included **million adults aged 18 years or older (**% of all U.S. adults), of which ** million (23.8%) were not aware of or did not report having diabetes (Table 1) (Methods). Ø The percentage of adults with diabetes increased with age, reaching a high of **% among those aged 65 years or older (Table 1).
