The future of the animal genetic market looks promising with opportunities in veterinary hospitals & clinics, diagnostic centers, and research centers & institutes. The global animal genetic market is expected to grow with a CAGR of 6%-8% from 2020 to 2025. The major drivers for this market are growing consumer demand for animal-derived protein based supplements, rising focus on classifying superior breeds using genetic engineering to obtain high reproduction rates, inventions in phenotyping services, growing pharmaceutical outsourcing, and rising adoption of advanced genetic technologies for massive scale production and quality breeds.

A total of XX figures / charts and XX tables are provided in this more than 150 page report to help in your business decisions. Sample figures with some insights are shown below. To learn the scope, benefits, companies researched, and other details of the global animal genetic market report, please download the report brochure.

In this market, live animals is the largest product and service segment of animal genetic, whereas dna testing is the largest genetic testing. Growth in various segments of the animal genetic market are given below:

The study includes trends and forecast for the global animal genetic market by product and service, genetic testing, end user, and region as follows:

By Product and Service [Value (\$ Million) shipment analysis for 2014 – 2025]:

Live Animals

Poultry

Porcine

Bovine

Canine

Genetic Materials

Semen

Bovine

Porcine

Embryo

Bovine

Equine Pellet Form

By Genetic Testing [Value (\$ Million) shipment analysis for 2014 – 2025]:

DNA Testing

DNA Typing

Genetic Disease Testing

By End User [Value (\$ Million) shipment analysis for 2014 – 2025]:

Veterinary Hospitals & Clinics

Diagnostic Centers

Research Centers and Institutes

Others

By Region [Value (\$ Million) shipment analysis for 2014 – 2025]:

North America

United States

Canada

Mexico

Europe

United Kingdom

Spain

Germany

France

Some of the animal genetic companies profiled in this report include Genus, Envigo

Corporation, Topigs Norsvin, CRV Holding, Groupe Grimaud La Corbiere, Hendrix Genetic, Neogen Corporation, Zoetis, URUS, and Animal Genetic.

Lucintel forecasts that live animals (poultry) will remain the largest product and service segment over the forecast period due to rise in the consumption rate of meat.

Within this market, DNA testing will remain the largest genetic testing segment over the forecast period due to growing number of genetic diseases and demand for early diagnosis.

North America will remain the largest region over the forecast period due to the presence of a large number of leading players of the animal genetic market in this region, high adoption of the latest technologies, established livestock sector, and the growing demand for animal protein.

Features of the Global Animal Genetic Market

Market Size Estimates: Global animal genetic market size estimation in terms of value (\$M) shipment.

Trend and Forecast Analysis: Market trends (2014-2019) and forecast (2020-2025) by various segments.

Segmentation Analysis: Global animal genetic market size by various segments, such as product and service, genetic testing, and end user in terms of value.

Regional Analysis: Global animal genetic market breakdown by the North America, Europe, Asia Pacific, and Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different product and service, genetic testing, end user, and region for the global animal genetic market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape of the global animal genetic market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

This report answers following key questions

Q.1 What are some of the most promising potential, high-growth opportunities for the global animal genetic market by product & service (live animals [poultry, porcine, bovine, and canine] and genetic materials [semen [bovine and porcine] and embryo [bovine and equine]]), genetic testing (DNA testing, DNA typing, and genetic disease testing), end user (veterinary hospitals & clinics, diagnostic centers, research centers and institutes, and others), and region (North America, Europe, Asia Pacific, and Rest of the World)?

Q.2 Which segments will grow at a faster pace and why?

Q.3 Which region will grow at a faster pace and why?

Q.4 What are the key factors affecting market dynamics? What are the drivers and challenges of the global animal genetic market?

Q.5 What are the business risks and threats to the global animal genetic market?

Q.6 What are the emerging trends in this animal genetic market and the reasons behind them?

Q.7 What are some changing demands of customers in this animal genetic market?

Q.8 What are the new developments in this animal genetic market? Which companies are leading these developments?

Q.9 Who are the major players in this animal genetic market? What strategic initiatives are being implemented by key players for business growth?

Q.10 What are some of the competitive products and processes in this animal genetic market, and how big of a threat do they pose for loss of market share via material or product substitution?

Q.11 What M&A activities did take place in the last five years in the global animal genetic market?
