### Artificial Turf Market Insights

Lucintel forecasts that multi-filament will remain the larger segment over the forecast period due to multi-filament yarns, constructed from multiple individual fibers twisted together, are remarkably strong and resilient and this translates to superior resistance to wear and tear, making them ideal for high-traffic areas.

APAC will remain the largest region over the forecast period due to fast-growing cities, experiencing a surge in population density and demand for urban infrastructure, and this creates a need for functional and low-maintenance green spaces within these densely packed areas.
