Automotive Structural Sheet Metal Trends and Forecast

The future of the global automotive structural sheet metal market looks promising with opportunities in the interior, drivetrain, engine, exterior, and chassis markets. The global automotive structural sheet metal market is expected to reach an estimated \$101.0 billion by 2030 with a CAGR of 4.1% from 2024 to 2030. The major drivers for this market are the strong need for metal sheets for external and interior construction components, growing interest in electric and hybrid vehicles, as well as the continuous trend of engine reduction to reduce emissions.

A more than 150-page report is developed to help in your business decisions. Sample figures with some insights are shown below.

Automotive Structural Sheet Metal by Segment

The study includes a forecast for the global automotive structural sheet metal by material, application, and region.

Automotive Structural Sheet Metal Market by Material [Shipment Analysis by Value from 2018 to 2030]:

Steel

Aluminum

Automotive Structural Sheet Metal Market by Application [Shipment Analysis by Value from 2018 to 2030]:

Interior

Drivetrain

Engine

Exterior

Chassis

Others

Automotive Structural Sheet Metal Market by Region [Shipment Analysis by Value from 2018 to 2030]:

North America

Europe

Asia Pacific

The Rest of the World

List of Automotive Structural Sheet Metal Companies

Companies in the market compete on the basis of product quality offered. Major players in this market focus on expanding their manufacturing facilities, R&D investments, infrastructural development, and leverage integration opportunities across the value chain. With these strategies automotive structural sheet metal companies cater increasing demand, ensure competitive effectiveness, develop innovative products & technologies, reduce production costs, and expand their customer base. Some of the automotive structural sheet metal companies profiled in this report include-

Associated Materials

ABC Sheet Metal

A&E Manufacturing

ATAS International

BlueScope Steel

Bud

General Sheet Metal Works

NCI Building Systems

Nucor

United States Steel

Automotive Structural Sheet Metal Market Insights

Lucintel forecasts that aluminum will remain the larger segment over the forecast period due to great strength to weight ratio, as well as, the contemporary advancements in sheet metal forming technologies are increasingly leaning towards the production of aluminum items over conventional materials such as steel.

APAC will remain the largest region over the forecast period due to rapidly increasing car production in the region.

Features of the Global Automotive Structural Sheet Metal Market

Market Size Estimates: Automotive structural sheet metal market size estimation in terms of value (\$B).

Trend and Forecast Analysis: Market trends (2018 to 2023) and forecast (2024 to 2030) by various segments and regions.

Segmentation Analysis: Automotive structural sheet metal market size by material, application, and region in terms of value (\$B).

Regional Analysis: Automotive structural sheet metal market breakdown by North America, Europe, Asia Pacific, and Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different material, application, and regions for the automotive structural sheet metal market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape of the automotive structural sheet metal market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

FAQ

Q1. What is the automotive structural sheet metal market size?

Answer: The global automotive structural sheet metal market is expected to reach an estimated \$101.0 billion by 2030.

Q2. What is the growth forecast for automotive structural sheet metal market?

Answer: The global automotive structural sheet metal market is expected to grow with a CAGR of 4.1% from 2024 to 2030.

Q3. What are the major drivers influencing the growth of the automotive structural sheet metal market?

Answer: The major drivers for this market are the strong need for metal sheets for external and interior construction components, growing interest in electric and hybrid vehicles, as well as the continuous trend of engine reduction to reduce emissions.

Q4. What are the major segments for automotive structural sheet metal market?

Answer: The future of the global automotive structural sheet metal market looks promising with opportunities in the interior, drivetrain, engine, exterior, and chassis markets.

Q5. Who are the key automotive structural sheet metal market companies?

Answer: Some of the key automotive structural sheet metal companies are as follows:

Associated Materials

ABC Sheet Metal

A&E Manufacturing

ATAS International

BlueScope Steel

Bud

General Sheet Metal Works

NCI Building Systems

Nucor

United States Steel

Q6. Which automotive structural sheet metal market segment will be the largest in future?

Answer: Lucintel forecasts that aluminum will remain the larger segment over the forecast period due to great strength to weight ratio, as well as, the contemporary advancements in sheet metal forming technologies are increasingly leaning towards the production of aluminum items over conventional materials such as steel.

Q7. In automotive structural sheet metal market, which region is expected to be the largest in next 5 years?

Answer: APAC will remain the largest region over the forecast period due to rapidly increasing car production in the region.

Q.8 Do we receive customization in this report?

Answer: Yes, Lucintel provides 10% customization without any additional cost.

This report answers following 11 key questions:

Q.1. What are some of the most promising, high-growth opportunities for the automotive structural sheet metal market by material (steel and aluminum), application (interior, drivetrain, engine, exterior, chassis, and others), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q.2. Which segments will grow at a faster pace and why?

Q.3. Which region will grow at a faster pace and why?

Q.4. What are the key factors affecting market dynamics? What are the key challenges and business risks in this market?

Q.5. What are the business risks and competitive threats in this market?

Q.6. What are the emerging trends in this market and the reasons behind them?

Q.7. What are some of the changing demands of customers in the market?

Q.8. What are the new developments in the market? Which companies are leading these developments?

Q.9. Who are the major players in this market? What strategic initiatives are key players pursuing for business growth?

Q.10. What are some of the competing products in this market and how big of a threat do they pose for loss of market share by material or product substitution?

Q.11. What M&A activity has occurred in the last 5 years and what has its impact been on the industry?
