Abstracts

The future of composite materials in the tooling market looks promising with opportunities in the wind energy, automotive, aerospace, marine, consumer goods, and construction industry. Composite materials in the tooling market are forecast to grow at a CAGR of 5.2% from 2020 to 2025. The major drivers for this market are increase in demand for light weight tools, decrease in lead time for part manufacturing, and increasing penetration of composite tooling in various end use industries.

An emerging trend, which has a direct impact on the dynamics of composites materials in tooling industry, includes increased use of metal/composites combination materials for tooling.

A total of 82 figures / charts and 58 tables are provided in this 150 -page report to help in your business decisions. Sample figures with some insights are shown below.

The study includes the composites materials in tooling market size and forecast of composite materials in the tooling market through 2025, segmented by application, raw material, material form, and region as follows:

Composite Materials in the Tooling Market by Application [Volume (M lbs) and Value (\$ Million) from 2014 to 2025]:

Transportation

Marine

Wind Energy

Aerospace

Construction

Consumer Goods

Others

Composite Materials in the Tooling Market by Raw Material Type [Volume (M lbs) and Value (\$ Million) from 2014 to 2025]:

Glass Fiber

Carbon Fiber

Epoxy Resin

BMI Resin

Others

Composite Materials in the Tooling Market by Material Form [Volume (M lbs) and Value (\$ Million) from 2014 to 2025]:

Fabric

Prepreg

Composite Materials in the Tooling Market by Region [Volume (M lbs) and Value (\$ Million) from 2014 to 2025]:

North America

Europe

Asia Pacific

ROW

Some of the composite materials of tooling companies profiled in this report include Gurit, Solvay cytec, Hexcel Corporation, Airtech Advanced Materials Group, and Toray and other.

On the basis of its comprehensive research, Lucintel forecasts that the glass fiber based composites tools will remain the largest material segment and it is also expected to witness the highest growth over the forecast period.

Within this market, wind energy will remain the largest application for composites tools market due to increasing wind MW installation in US and Asia Pacific region and increase in length of blade. Composite tools for aerospace application is expected to witness the highest growth over the forecast period. Composite tools provide lightweight, dimensionally accurate, and affordable tooling for various applications in aerospace, such as primary and secondary structure.

North America will remain the largest region and it is also expected to witness the highest growth over the forecast period due to growth in wind energy, aerospace, and marine industry.

Some of the features of “Composites Materials in Tooling Market Report: Trends, Forecast and Competitive Analysis” include:

Market size estimates: Composites materials in tooling market size estimation in terms of value (\$M) and volume (M Lbs.) shipment.

Trend and forecast analysis: Market trend (2014-2019) and forecast (2020-2025) by application, and end use industry.

Segmentation analysis: Composites materials in tooling market size by various applications such as application, raw material, and material form type in terms of value and volume shipment.

Regional analysis: Composites materials in tooling market breakdown by North America, Europe, Asia Pacific, and the Rest of the World.

Growth opportunities: Analysis on growth opportunities in different applications and regions of composites materials in tooling market.

Strategic analysis: This includes M&A, new product development, and competitive landscape of composites materials in tooling market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

This report answers following 11 key questions:

Q1.What are some of the most promising, high-growth areas of composite materials in the tooling market by application (transportation, marine, wind energy, aerospace, construction, consumer goods, and others), raw material (glass fiber, carbon fiber, epoxy, BMI, and others), material form (fabric and prepreg), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q2.Which application segments will grow at a faster pace and why?

Q3.Which region will grow at a faster pace and why?

Q4.What are the key factors affecting market dynamics? What are the drivers and challenges of composite materials in the tooling market?

Q5.What are the business risks and competitive threats of composite materials in the tooling market?

Q6.What are emerging trends of composite materials in the tooling market and the reasons behind them?

Q7.What are some changing demands of customers of composite materials in the tooling market?

Q8.What are the new developments of composite materials in the tooling market and which companies are leading these developments?

Q9.Who are the major players of composite materials in the tooling market? What strategic initiatives are being implemented by key players for business growth?

Q10. What are some of the competitive products of composite materials in the tooling market and how great of a threat do they pose for loss of market share through product substitution?

Q11. What M & A activities have transpired in the last 5 years of composite materials in the tooling market and how have they affected the industry?

Contents

1. EXECUTIVE SUMMARY

2. MARKET BACKGROUND AND CLASSIFICATIONS

2.1: Introduction, Background, and Classifications

2.2: Supply Chain

2.3: Industry Drivers and Challenges

3. MARKET TRENDS AND FORECAST ANALYSIS FROM 2014 TO 2025

3.1: Macroeconomic Trends and Forecast

3.2: Composites Tooling Market Trends and Forecast

3.3: Composites Tooling Market by End Use Industry

3.3.1: Transportation

3.3.2: Marine

3.3.3: Wind Energy

3.3.4: Aerospace

3.3.5: Construction

3.3.6: Consumer Goods

3.3.7: Others

3.4: Composites Materials in Tooling Market by Material Form

3.5: Composites Materials in Tooling Market by Raw Material

3.5.1: Composites Materials in Tooling Market by Fiber

3.5.2: Composites Materials in Tooling Market by Resin

4. MARKET TRENDS AND FORECAST ANALYSIS BY REGION

4.1: Composites Materials in Tooling Market by Region

4.2: North American Composites Materials in Tooling Market

4.3: European Composites Materials in Tooling Market

4.4: APAC Composites Materials in Tooling Market

4.5: ROW Composites Materials in Tooling Market

5. COMPETITOR ANALYSIS

5.1: Product Portfolio Analysis

5.2: Market Share Analysis

- 5.3: Operational Integration
- 5.4: Geographical Reach
- 5.5: Porter's Five Forces Analysis

6. GROWTH OPPORTUNITIES AND STRATEGIC ANALYSIS

- 6.1: Growth Opportunity Analysis
 - 6.1.1: Growth Opportunities for the Composites Materials in Tooling Market by End Use Industry
 - 6.1.2: Growth Opportunities for the Composites Materials in Tooling Market by Region
- 6.2: Emerging Trends in the Composites Materials in Tooling Market
- 6.3: Strategic Analysis
 - 6.3.1: New Product Development
 - 6.3.2: Mergers, Acquisitions, and Joint Ventures in the Composites Materials in Tooling Market

7. COMPANY PROFILES OF LEADING PLAYERS

- 7.1: Toray Industries Inc.
- 7.2: Hexcel Corporation
- 7.3: Trelleborg AB
- 7.4: Cytex Solvay Group
- 7.5: Airtech Advanced Materials Group
