Abstracts

Data Center in Optical Transceiver Market Trends and Forecast

The future of the data center in optical transceiver market looks promising with opportunities in the data center interconnect and intra-data center connection applications. The data center in the global optical transceiver market is expected to reach an estimated \$5.0 billion by 2028 with a CAGR of 17.5% from 2023 to 2028. The major drivers for this market are increasing demand for high-capacity data transmission in networking industries, rising number of internet users, and growing adoption of fiber optics technology.

A more than 150-page report is developed to help in your business decisions. Sample figures with some insights are shown below.

Data Center in Optical Transceiver Market by Segment

The study includes a forecast for the data center in the global optical transceiver market by form factor, product type, wavelength, application, and region, as follows:

Data Center in Optical Transceiver Market by Form Factor [Value (\$B) Shipment Analysis from 2017 to 2028]:

QSFP, QSFP+, QSFP-DD, and QSFP28

SFP, SFP+ and SFP28

CFP, CFP2, and CFP4

XFP

CXP

SFF

Data Center in Optical Transceiver Market by Product Type [Value (\$B) Shipment Analysis from 2017 to 2028]:

Single Mode Fiber

Multimode Fiber

Data Center in Optical Transceiver Market by Wavelength [Value (\$B) Shipment Analysis from 2017 to 2028]:

Long-Range

Extended-Range

Short-Range

Others

Data Center in Optical Transceiver Market by Application [Value (\$B) Shipment Analysis from 2017 to 2028]:

Data Center Interconnects

Intra-data Center Connections

Data Center in Optical Transceiver Market by Region [Value (\$B) Shipment Analysis from 2017 to 2028]:

North America

Europe

Asia Pacific

The Rest of the World

List of Data Center in Optical Transceiver Companies

Companies in the market compete on the basis of product quality offered. Major players in this market focus on expanding their manufacturing facilities, R&D investments, infrastructural development, and leverage integration opportunities across the value chain. With these strategies data center in optical transceiver companies cater to increasing demand, ensure competitive effectiveness, develop innovative products & technologies, reduce production costs, and expand their customer base. Some of the data center in optical transceiver companies profiled in this report include.

Hisense Broadband

Huawei Technologies

Juniper Networks

Smartoptics

InnoLight

Data Center in Optical Transceiver Market Insights

Lucintel forecasts that single mode fiber will remain the larger segment over the forecast period due to rapid expansion of telecom infrastructure, growing demand for high-data-rate modules, and increasing need for optical communications for low signal attenuation and high bandwidth.

Within this market, QSFP, QSFP+, QSFP-DD, and QSFP28, SFP, SFP+ and SFP28, CFP, CFP2, and CFP4, XFP, CXP, and SFF are the major segments of

data center in optical transceiver market by form factor. Lucintel predicts that QSFP, QSFP+, QSFP-DD, and QSFP28 will remain the largest segment over the forecast period due to the augmenting demand for small sized transceiver, which consumes less energy and ensures high speed transmissions.

APAC is expected to witness highest growth over the forecast period due to the growing demand for optical modules among data centers and 5G & cloud technologies and continuous development in the digital infrastructure of the region.

Features of the Data Center in Optical Transceiver Market

Market Size Estimates: Data center in optical transceiver market size estimation in terms of value (\$B)

Trend And Forecast Analysis: Market trends (2017-2022) and forecast (2023-2028) by various segments and regions.

Segmentation Analysis: Data center in optical transceiver market size by various segments, such as by form factor, product type, wavelength, application, and region

Regional Analysis: Data center in optical transceiver market breakdown by North America, Europe, Asia Pacific, and the Rest of the World.

Growth Opportunities: Analysis on growth opportunities in different by form factor, product type, wavelength, application, and regions for the data center in optical transceiver market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape for the data center in optical transceiver market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

FAQ

Q1. What is the data center in optical transceiver market size?

Answer: The data center in the global optical transceiver market is expected to reach an estimated \$5.0 billion by 2028.

Q2. What is the growth forecast for data center in optical transceiver market?

Answer: The data center in the global optical transceiver market is expected to grow with a CAGR of 17.5% from 2023 to 2028.

Q3. What are the major drivers influencing the growth of the data center in optical transceiver market?

Answer: The major drivers for this market are increasing demand for high-capacity data transmission in networking industries, rising number of internet users, and growing adoption of fiber optics technology.

Q4. What are the major segments for data center in optical transceiver market?

Answer: The future of the data center in optical transceiver market looks promising with opportunities in the data center interconnect and intra-data center connection applications.

Q5. Who are the key data center in optical transceiver companies?

Answer: Some of the key data center in optical transceiver companies are as follows:

Hisense Broadband

Huawei Technologies

Juniper Networks

Smartoptics

InnoLight

Q6. Which data center in optical transceiver segment will be the largest in future?

Answer: Lucintel forecasts that single mode fiber will remain the larger segment over the forecast period due rapid expansion of telecom infrastructure, growing demand for high-data-rate modules, and increasing need for optical communications for low signal attenuation and high bandwidth.

Q7. In data center in optical transceiver market, which region is expected to be the largest in next 5 years?

Answer: APAC is expected to witness highest growth over the forecast period due to the growing demand for optical modules among data centers and 5G & cloud technologies and continuous development in the digital infrastructure of the region.

Q8. Do we receive customization in this report?

Answer: Yes, Lucintel provides 10% Customization Without any Additional Cost.

This report answers following 11 key questions

Q.1. What are some of the most promising, high-growth opportunities for the data center in optical transceiver market by form factor (QSFP, QSFP+, QSFP-DD, and QSFP28, SFP, SFP+ and SFP28, CFP, CFP2, and CFP4, XFP, CXP, and SFF), product type (single mode fiber and multimode fiber), wavelength (long-range, extended-range, short-range, and others), application (data center interconnects and intra-data center connections), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q.2. Which segments will grow at a faster pace and why?

Q.3. Which region will grow at a faster pace and why?

Q.4. What are the key factors affecting market dynamics? What are the key challenges and business risks in this market?

Q.5. What are the business risks and competitive threats in this market?

Q.6. What are the emerging trends in this market and the reasons behind them?

Q.7. What are some of the changing demands of customers in the market?

Q.8. What are the new developments in the market? Which companies are leading these developments?

Q.9. Who are the major players in this market? What strategic initiatives are key players pursuing for business growth?

Q.10. What are some of the competing products in this market and how big of a threat do they pose for loss of market share by material or product substitution?

Q.11. What M&A activity has occurred in the last 5 years and what has its impact been on the industry?

For any questions related to data center in the global optical transceiver market or related to data center in the global optical transceiver companies, data center in the global optical transceiver market size, data center in the global optical transceiver market share, data center in the global optical transceiver analysis, write Lucintel analyst at email: helpdesk@lucintel.com we will be glad to get back to you soon.

Contents

1. EXECUTIVE SUMMARY

2. DATA CENTER IN THE GLOBAL OPTICAL TRANSCEIVER MARKET: MARKET DYNAMICS

2.1: Introduction, Background, and Classifications

2.2: Supply Chain

2.3: Industry Drivers and Challenges

3. MARKET TRENDS AND FORECAST ANALYSIS FROM 2017 TO 2028

3.1: Macroeconomic Trends (2017-2022) and Forecast (2023-2028)

3.2: Data Center in the Global Optical Transceiver Market Trends (2017-2022) and Forecast (2023-2028)

3.3: Data Center in the Global Optical Transceiver Market by Form Factor

3.3.1: QSFP, QSFP+, QSFP-DD, and QSFP28

3.3.2: SFP

3.3.3: SFP+ and SFP28

3.3.4: CFP, CFP2, and CFP4

3.3.5: XFP

3.3.6: CXP

3.3.7: SFF

3.4: Data Center in the Global Optical Transceiver Market by Product Type

3.4.1: Single Mode Fiber

3.4.2: Multimode Fiber

3.5: Data Center in the Global Optical Transceiver Market by Wavelength

3.5.1: Long-Range

3.5.2: Extended-Range

3.5.3: Short-Range

3.5.4: Others

3.6: Data Center in the Global Optical Transceiver Market by Application

3.6.1: Data Center Interconnects

3.6.2: Intra-Data Center Connections

4. MARKET TRENDS AND FORECAST ANALYSIS BY REGION FROM 2017 TO 2028

4.1: Data Center in the Global Optical Transceiver Market by Region

4.2: North American Data Center in Optical Transceiver Market

4.2.1: North American Data Center in Optical Transceiver Market by Product Type: Single Mode Fiber and Multimode Fiber

4.2.2: North American Data Center in Optical Transceiver Market by Application: Data Center Interconnects and Intra-Data Center Connections

4.3: European Data Center in Optical Transceiver Market

4.3.1: European Data Center in Optical Transceiver Market by Product Type: Single Mode Fiber and Multimode Fiber

4.3.2: European Data Center in Optical Transceiver Market by Application: Data Center Interconnects and Intra-Data Center Connections

4.4: APAC Data Center in Optical Transceiver Market

4.4.1: APAC Data Center in Optical Transceiver Market by Product Type: Single Mode Fiber and Multimode Fiber

4.4.2: APAC Data Center in Optical Transceiver Market by Application: Data Center Interconnects and Intra-Data Center Connections

4.5: ROW Data Center in Optical Transceiver Market

4.5.1: ROW Data Center in Optical Transceiver Market by Product Type: Single Mode Fiber and Multimode Fiber

4.5.2: ROW Data Center in Optical Transceiver Market by Application: Data Center Interconnects and Intra-Data Center Connections

5. COMPETITOR ANALYSIS

5.1: Product Portfolio Analysis

5.2: Operational Integration

5.3: Porter's Five Forces Analysis

6. GROWTH OPPORTUNITIES AND STRATEGIC ANALYSIS

6.1: Growth Opportunity Analysis

6.1.1: Growth Opportunities for the Data Center in the Global Optical Transceiver Market by Form Factor

6.1.2: Growth Opportunities for the Data Center in the Global Optical Transceiver Market by Product Type

6.1.3: Growth Opportunities for the Data Center in the Global Optical Transceiver Market by Wavelength

6.1.4: Growth Opportunities for the Data Center in the Global Optical Transceiver Market by Application

6.1.5: Growth Opportunities for the Data Center in the Global Optical Transceiver Market by Region

6.2: Emerging Trends in the Data Center in the Global Optical Transceiver Market

6.3: Strategic Analysis

6.3.1: New Product Development

6.3.2: Capacity Expansion of the Data Center in the Global Optical Transceiver Market

6.3.3: Mergers, Acquisitions, and Joint Ventures in the Data Center in the Global Optical Transceiver Market

6.3.4: Certification and Licensing

7. COMPANY PROFILES OF LEADING PLAYERS

7.1: Hisense Broadband

7.2: Huawei Technologies

7.3: Juniper Networks

7.4: Smartoptics

7:5: INNOLIGHT
