Diatomaceous Earth Market Trends and Forecast

The future of the global diatomaceous earth market looks promising with opportunities in the filter aids, fillers, absorbents, construction materials, and other applications. The global diatomaceous earth market is expected to reach an estimated \$1.5 billion by 2030 with a CAGR of 5.0% from 2024 to 2030.

Lucintel forecasts that natural diatomaceous earth will remain the largest segment due to rising demand from filter aid and absorbent applications. The calcined diatomaceous earth segment is expected to witness the highest growth rate due to its increasing usage in the food and beverage industry.

Filter aids will remain the largest application and witness the highest growth during the forecast period due to increasing demand for calcined and natural diatomite in filter aid and construction material applications.

North America will remain the largest region, and APAC is expected to witness the highest growth over the forecast period, supported by rising demand from various industries, such as water treatment, industrial applications, abrasive, medical and healthcare, absorbents, and crop protection chemicals.

APAC is expected to witness the highest growth in the Diatomaceous Earth Market

1. **United States:** Companies like EP Minerals and Imerys are expanding their production capacities and investing in sustainable mining practices. The US government's focus on sustainable agriculture and organic farming boosts the demand for diatomaceous earth in pest control and soil conditioning.
2. **China:** Chinese companies such as Qingdao Best Diatomite Co., Ltd. are enhancing their production technologies to produce high-quality diatomaceous earth for various applications, including filtration and agriculture. Government policies promoting environmental protection and sustainable farming drive market growth.
3. **India:** Firms like Seema Minerals and JJS Minerals are expanding their production to cater to the growing demand from the agriculture and filtration sectors. Government initiatives to promote organic farming and sustainable agriculture are key drivers.
4. **Germany:** Companies such as Diatomite Europe GmbH are focusing on the development of high-performance diatomaceous earth products for industrial and agricultural applications. Germany's stringent environmental regulations and focus on sustainable practices support market expansion.
5. **Australia:** Australian companies like Mount Sylvia Diatomite are developing advanced diatomaceous earth products for use in agriculture and environmental applications. Government projects aimed at promoting sustainable land management and organic farming drive market demand.

Emerging Trends in the Diatomaceous Earth Market

Emerging trends, which have a direct impact on the dynamics of the industry, include increasing adoption of diatomaceous earth as an insecticide and increasing penetration of diatomite in filtration application.

A total of 107 figures / charts and 68 tables are provided in this 205-page report to help in your business decisions. A sample figure with insights is shown below.

Diatomaceous Earth Market by Segment

The study includes trends and forecast for the global diatomaceous earth market by product, application, and region as follows:

Diatomaceous Earth Market by Product [Value (\$M) and Volume (Kilotons) shipment analysis for 2018 – 2030]:

Natural

Calcined

Flux-Calcined

Diatomaceous Earth Market by Application [Value (\$M) and Volume (Kilotons) shipment analysis for 2018 – 2030]:

Filter Aids

Construction Material

Fillers

Absorbents

Others

Diatomaceous Earth Market by Region [Value (\$M) and Volume (Kilotons) shipment analysis for 2018 – 2030]:

North America

US

Canada

Mexico

Europe

Germany

United Kingdom

Italy

France

Asia Pacific

China

Japan

India

South Korea

The Rest of the World

List of Diatomaceous Earth Companies

Companies in the market compete on the basis of product quality offered. Major players in this market focus on expanding their manufacturing facilities, R&D investments, infrastructural development, and leverage integration opportunities across the value chain. With these strategies diatomaceous earth companies cater increasing demand, ensure competitive effectiveness, develop innovative products & technologies, reduce production costs, and expand their customer base. Some of the diatomaceous earth companies profiled in this report includes.

Imerys S.A.

Showa Chemical

Calgon Carbon Corporation

US Silica

Dicalite Management Group

Reade Advanced Materials

Jilin Yuantong Minerals

JJS Minerals

Qingda%li%Best Diatomite

Diatomit SP CJSC

Recent Developments in the Diatomaceous Earth Market

Growing Demand in Agriculture: Diatomaceous Earth continues to see increased usage in agriculture, particularly in pest control and soil amendment applications. Farmers are increasingly turning to DE as a natural and sustainable alternative to synthetic pesticides and fertilizers, contributing to its growing demand in the agricultural sector.

Expansion in Food and Beverage Industry: Diatomaceous Earth is widely used as a filtration aid in the food and beverage industry, particularly in the production of beverages like beer, wine, and fruit juices. With the rising consumption of processed foods and beverages globally, there's a parallel increase in the demand for DE filtration products to ensure product quality and purity.

Rising Interest in Industrial Applications: The industrial applications of Diatomaceous Earth, such as filtration in water treatment, paints and coatings, and oil and gas refining, are gaining traction due to its high porosity, inert nature, and low environmental impact. As industries prioritize sustainability and efficiency, DE-based filtration solutions are becoming increasingly popular.

Focus on Product Innovation: Manufacturers of Diatomaceous Earth products are investing in research and development to introduce innovative formulations and applications. This includes the development of enhanced filtration grades for specific industrial processes, as well as value-added products with improved performance characteristics for agricultural and consumer applications.

Regulatory Compliance and Safety Standards: With growing awareness of health and safety issues, there's increased emphasis on regulatory compliance and safety standards in the production and use of Diatomaceous Earth products. Manufacturers are ensuring adherence to regulations regarding product purity, handling procedures, and environmental impact to meet the expectations of regulators and consumers.

Features of Diatomaceous Earth Market

Market Size Estimates: Diatomaceous earth market size estimation in terms of value (\$M) and Volume (Kilotons)

Trend and Forecast Analysis: Market trends (2018-2023) and forecast (2024-2030) by various segments and regions.

Segmentation Analysis: Market size by product and application

Regional Analysis: Diatomaceous earth market breakdown by North America, Europe, Asia Pacific, and the Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different product, application, and regions for the diatomaceous earth market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape for the diatomaceous earth market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

FAQ

Q1. What is the diatomaceous earth market size?

Answer: The global diatomaceous earth market is expected to reach an estimated \$1.5 billion by 2030.

Q2. What is the growth forecast for diatomaceous earth market?

Answer: The diatomaceous earth market is expected to grow at a CAGR of 5.0% from 2024 to 2030.

Q3. What are the major drivers influencing the growth of the diatomaceous earth market?

Answer: The major drivers for this market are growth in the construction sector, rising demand from filtration applications, and increasing usage in the food and beverage and healthcare sectors.

Q4. What are the major applications or end use industries for diatomaceous earth?

Answer: Filter aids, construction materials, fillers, absorbents, and others are the major application for diatomaceous earth.

Q5. What are the emerging trends in diatomaceous earth market?

Answer: Emerging trends, which have a direct impact on the dynamics of the industry, include increasing adoption of diatomaceous earth as an insecticide and increasing penetration of diatomite in filtration application.

Q6. What are the key diatomaceous earth companies?

Answer: Some of the key diatomaceous earth companies are as follows:

Imerys S.A.

Showa Chemical

Calgon Carbon Corporation

US Silica

Dicalite Management Group

Reade Advanced Materials

Jilin Yuantong Minerals

JJS Minerals

Qingda%li%Best Diatomite

Diatomit SP CJSC

Q7.Which diatomaceous earth product segment will be the largest in future?

Answer: Lucintel forecasts that natural diatomaceous earth will remain the largest segment due t%li%rising demand from filter aid and absorbent applications. The calcined diatomaceous earth segment is expected t%li%witness the highest growth rate due t%li%its increasing usage in the food and beverage industry.

Q8: In diatomaceous earth market, which region is expected t%li%be the largest in next 5 years?

Answer: North America is expected t%li%remain the largest region over next 5 years.

Q9. D%li%we receive customization in this report?

Answer: Yes, Lucintel provides 10% Customization Without any Additional Cost.

This report answers following 11 key questions

Q.1 What are some of the most promising potential, high growth opportunities for the global diatomaceous earth market by product (natural, calcined, and flux-calcined), application (filter aids, construction materials, fillers, absorbents, and others), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q. 2 Which segments will grow at a faster pace and why?

Q.3 Which regions will grow at a faster pace and why?

Q.4 What are the key factors affecting market dynamics? What are the drivers and challenges of the market?

Q.5 What are the business risks and threats to the market?

Q.6 What are the emerging trends in this market and the reasons behind them?

Q.7 What are the changing demands of customers in the market?

Q.8 What are the new developments in the market? Which companies are leading these developments?

Q.9 Who are the major players in this market? What strategic initiatives are being implemented by key players for business growth?

Q.10 What are some of the competitive products and processes in this area and how big of a threat do they pose for loss of market share via material or product substitution?

Q.11 What M & A activities have taken place in the last 5 years in this market?

For any questions related to diatomaceous earth market or related diatomaceous earth market share, diatomaceous earth market analysis, diatomaceous earth market size, diatomaceous earth manufacturers, and diatomaceous earth applications, write to Lucintel analysts at helpdesk@lucintel.com. We will be glad to get back to you soon.

Contents

1. EXECUTIVE SUMMARY

2. MARKET BACKGROUND AND CLASSIFICATIONS

2.1: Introduction, Background, and Classifications

2.2: Supply Chain

2.3: Industry Drivers and Challenges

3. MARKET TRENDS AND FORECAST ANALYSIS FROM 2018 TO 2030

3.1: Macroeconomic Trends (2018-2023) and Forecast (2024-2030)

3.2: Global Diatomaceous Earth Market Trends (2018-2023) and Forecast (2024-2030)

3.3: Global Diatomaceous Earth Market by Product

3.3.1: Natural

3.3.2: Calcined

3.3.3: Flux-Calcined

3.4: Global Diatomaceous Earth Market by Application

3.4.1: Filter Aids

3.4.2: Construction Material

3.4.3: Fillers

3.4.4: Absorbents

3.4.5: Others

4. MARKET TRENDS AND FORECAST ANALYSIS BY REGION FROM 2018 TO 2030

4.1: Global Diatomaceous Earth Market by Region

4.2: North American Diatomaceous Earth Market

4.2.1: Market by Product

4.2.2: Market by Application

4.2.3: The US Diatomaceous Earth Market

4.2.4: The Canadian Diatomaceous Earth Market

4.2.5: The Mexican Diatomaceous Earth Market

4.3: European Diatomaceous Earth Market

4.3.1: Market by Product

4.3.2: Market by Application

4.3.3: German Diatomaceous Earth Market

- 4.3.4: United Kingdom Diatomaceous Earth Market
- 4.3.5: French Diatomaceous Earth Market
- 4.3.6: Italian Diatomaceous Earth Market
- 4.4: APAC Diatomaceous Earth Market
 - 4.4.1: Market by Product
 - 4.4.2: Market by Application
 - 4.4.3: Chinese Diatomaceous Earth Market
 - 4.4.4: Japanese Diatomaceous Earth Market
 - 4.4.5: Indian Diatomaceous Earth Market
 - 4.4.6: South Korean Diatomaceous Earth Market
- 4.5: ROW Diatomaceous Earth Market
 - 4.5.1: Market by Product
 - 4.5.2: Market by Application

5. COMPETITOR ANALYSIS

- 5.1: Product Portfolio Analysis
- 5.2: Market Share Analysis
- 5.3: Geographical Reach
- 5.4: Porter's Five Forces Analysis

6. GROWTH OPPORTUNITIES AND STRATEGIC ANALYSIS

- 6.1: Growth Opportunity Analysis
 - 6.1.1: Growth Opportunities for the Global Diatomaceous Earth Market by Product
 - 6.1.2: Growth Opportunities for the Global Diatomaceous Earth Market by Application
 - 6.1.3: Growth Opportunities for the Global Diatomaceous Earth Market by Region
- 6.2: Emerging Trends in the Global Diatomaceous Earth Market
- 6.3: Strategic Analysis
 - 6.3.1: New Product Development
 - 6.3.2: Capacity Expansion of the Global Diatomaceous Earth Market
 - 6.3.3: Technology Development
 - 6.3.4: Mergers and Acquisitions in the Global Diatomaceous Earth Industry

7. COMPANY PROFILES OF LEADING PLAYERS

- 7.1: Imerys S.A.
- 7.2: Showa Chemical
- 7.3: Calgon Carbon Corporation

- 7.4: US Silica
- 7.5: Dicalite Management Group
- 7.6: Reade Advanced Materials
- 7.7: Jilin Yuantong Minerals Co.
- 7.8: JJS Minerals
- 7.9: Qingdao Best Diatomite Co., Ltd
- 7.10: Diatomit SP CJSC
