E-Commerce Logistics Market Insights

Lucintel forecasts that transportation will remain the largest service type segment over the forecast period due to the integration of e-commerce logistics with transportation management software (TMS) and an increase in optimizing the flow of goods and leveraging consolidated capacity.

Within this market, domestic is expected to remain the largest operational area segment because SMEs diversify exports to increase their market share and increase their

customer base, which helps in increasing social gains by enabling online presence and accessibility to global consumer.

APAC will remain the largest region due to the region's strong economic growth along with the ongoing development in e-commerce logistics and inventory management, which drives organizations to invest heavily in e-commerce logistics market to sustain growth and improve productivity.
