The future of the food anti-caking agent market looks promising with opportunities in various applications, such as seasonings & condiments, bakery, dairy products, and soups & sauces. The global food anti-caking agent market is expected to grow with a CAGR of 3% to 5% from 2021 to 2026. The major drivers for this market are increasing demand for convenience food, growing demand for food products with better quality and longer shelf life, and growing usage of food anti-caking agents in various food applications.

A more than 150 page report is developed to help in your business decisions. Sample figures with some insights are shown below. To learn the scope of, benefits, companies researched and other details of food anti-caking agents market report download the report brochure.

The study includes trends and forecasts for the global food anti-caking agents market by type, application, and region as follows:

By Type [Volume (kilotons) and \$M shipment analysis for 2015 – 2026]:

Calcium compounds

Silicon dioxide

Sodium compounds

## Magnesium compounds

Microcrystalline cellulose

Others

By Application [Volume (kilotons) and \$M shipment analysis for 2015 – 2026]:

Seasonings & condiments

Bakery

Dairy products

Soups & sauces

Others

By Region [Volume (kilotons) and \$M shipment analysis for 2015 – 2026]:

North America

United States

Canada

Mexico

Europe

Germany

United Kingdom

France

Italy

Asia Pacific

China

Japan

India

South Korea

The Rest of the World

Calcium compounds will remain the largest type segment owing to their functionality and suitability in product formulations.

Some of the food anti-caking agents companies profiled in this report include Evonik Industries, PPG Industries, Brenntag, Univar, Solvay, Agropur Ingredients, Huber Engineered Materials, International Media and Cultures, Inc., PQ Corporation, and Sweetener Supply Corp.

#### Features of Food anti-caking agents Market

**Market Size Estimates:** Food anti-caking agents market size estimation in terms of value (\$M) and volume (kilotons)

**Trend and Forecast Analysis:** Market trends (2015-2020) and forecast (2021-2026) by various segments and regions.

**Segmentation Analysis:** Market size by type and application

**Regional Analysis:** Food anti-caking agents market breakdown by North America, Europe, Asia Pacific, and the Rest of the World.

**Growth Opportunities:** Analysis on growth opportunities in different type, application, and regions for food anti-caking agents market.

**Strategic Analysis:** This includes M&A, new product development, and

competitive landscape for the food anti-caking agents market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

This report answers following 11 key questions

Q.1 What are some of the most promising potential, high-growth opportunities for the global food anti-caking agents market by type (calcium compounds, silicon dioxide, sodium compounds, magnesium compounds, microcrystalline cellulose, and others), application (seasonings & condiments, bakery, dairy products, soups & sauces, and other), and region (North America, Europe, Asia Pacific, and the Rest of the World)?

Q.2 Which segments will grow at a faster pace and why?

Q.3 Which regions will grow at a faster pace and why?

Q.4 What are the key factors affecting market dynamics? What are the drivers and challenges of the food anti-caking agents market?

Q.5 What are the business risks and threats to the food anti-caking agents market?

Q.6 What are emerging trends in this food anti-caking agents market and the reasons behind them?

Q.7 What are some changing demands of customers in the food anti-caking agents market?

Q.8 What are the new developments in the food anti-caking agents market? Which companies are leading these developments?

Q.9 Who are the major players in the food anti-caking agents market? What strategic initiatives are being implemented by key players for business growth?

Q.10 What are some of the competitive products and processes in the food anti-caking agents market, and how big of a threat do they pose for loss of market share via material or product substitution?

Q.11 What M&A activities did take place in the last five years in the food anti-caking agents market?
