Some of the food Antioxidant companies profiled in this report include BASF, DuPont, Kemin, ADM, DSM, Eastman Chemical Company, Camlin Fine Sciences, and Barentz Group.

Lucintel forecasts that synthetic antioxidants will remain the largest segment over the forecast period, as they are multi-functional and add value to a food product by enhancing its shelf life and various health benefits, such as protection from certain cardiovascular diseases.

Within this market, prepared meat & poultry will remain the largest application segment over the forecast period due to the properties of antioxidants that hinder lipid oxidation and reduce rancidity without any undesirable impact on the nutritional or sensory properties. This results in quality preservation and extended shelf life of meat & poultry products.

Asia Pacific will remain the largest region, and it is also expected to witness the highest

growth over the forecast period due to increasing awareness of consumers regarding the benefits of fortified food and the demand for natural antioxidants in this region.
