Lucintel forecasts that starch will remain the largest type segment over the forecast period, as it costs lower than other food thickeners, and it also has optimum functionality.

Within this market, dairy & frozen desserts will remain the largest application segment over the forecast period due to the wide usage of food thickeners not only for thickening

but also for other functional purposes, such as flavor and texture enhancement in products. The beverage segment is projected to witness the fastest growth during the forecast period due to a number of innovations in the beverage sector, coupled with additional properties of food thickeners, such as fat replacement, water binding, emulsifying, and texturizing.

North America will remain the largest region over the forecast period due to high consumption of hydrocolloids, proteins, and starch & starch derivatives in a diverse range of food & beverage applications in this region.
