In this market, quality assurance is the largest function of food ultrasound, whereas meat is the largest food product. Growth in various segments of the food ultrasound market are given below:

The study includes trends and forecast for the global food ultrasound market by frequency range, food product, function, and region as follows:

By Frequency Range [Value (\$ Million) shipment analysis for 2014 – 2025]:

High-Intensity

Low-Intensity

By Food Product [Value (\$ Million) shipment analysis for 2014 – 2025]:

Meat

Beverages

Flavours

Dairy

Bakery

By Function [Value (\$ Million) shipment analysis for 2014 – 2025]:

Microbial Inactivation

Quality Assurance

Homogenization

Cutting

By Region [Value (\$ Million) shipment analysis for 2014 – 2025]:

North America

United States

Canada

Mexico

Europe

United Kingdom

Spain

Germany

France

Asia Pacific

Some of the food ultrasound companies profiled in this report include Bosch, Emerson, B?hler, Dukane, Heilscher, Siemens, Newtech, Cheersonic, Rinco Ultrasonics, Omni international, Sonics & Materials, Elliptical Design, Marchant Schmidt, and Sonomechanics.

Lucintel forecasts that quality assurance will remain the largest function segment over the forecast period, as in meat production, ultrasonic technology accelerates the process of margination and pickling.

Within this market, meat will remain the largest food product segment over the forecast period due to the growing demand for process efficiency through shortened processing time and energy-saving technology.

Asia Pacific will remain the largest region, and it is also expected to witness the highest growth over the forecast period due to adoption of the latest techniques for food processing to meet the growing food demand in the emerging economies and the growing research & development activities for launching new technologies.

Features of the Global Food Ultrasound Market

Market Size Estimates: Global food ultrasound market size estimation in terms

of value (\$M) shipment.

Trend and Forecast Analysis: Market trends (2014-2019) and forecast (2020-2025) by various segments.

Segmentation Analysis: Global food ultrasound market size by various segments, such as frequency range, food product, and function in terms of value.

Regional Analysis: Global food ultrasound market breakdown by the North America, Europe, Asia Pacific, and Rest of the World.

Growth Opportunities: Analysis of growth opportunities in different frequency range, food product, function, and region for the global food ultrasound market.

Strategic Analysis: This includes M&A, new product development, and competitive landscape of the global food ultrasound market.

Analysis of competitive intensity of the industry based on Porter's Five Forces model.

This report answers following key questions

Q.1 What are some of the most promising potential, high-growth opportunities for the global food ultrasound market by frequency range (high-intensity and low-intensity), food product (meat, beverages, flavours, dairy, and bakery), function (microbial inactivation, quality assurance, homogenization, and cutting), and region (North America, Europe, Asia Pacific, and Rest of the World)?

Q.2 Which segments will grow at a faster pace and why?

Q.3 Which region will grow at a faster pace and why?

Q.4 What are the key factors affecting market dynamics? What are the drivers and challenges of the global food ultrasound market?

Q.5 What are the business risks and threats to the global food ultrasound market?

Q.6 What are emerging trends in this food ultrasound market and the reasons behind them?

Q.7 What are some changing demands of customers in this food ultrasound market?

Q.8 What are the new developments in this food ultrasound market? Which companies are leading these developments?

Q.9 Who are the major players in this food ultrasound market? What strategic initiatives are being implemented by key players for business growth?

Q.10 What are some of the competitive products and processes in this food ultrasound market, and how big of a threat do they pose for loss of market share via material or product substitution?

Q.11 What M&A activities did take place in the last five years in the global food ultrasound market?
